

# Storytelling with data at NASA's Earth Information Center

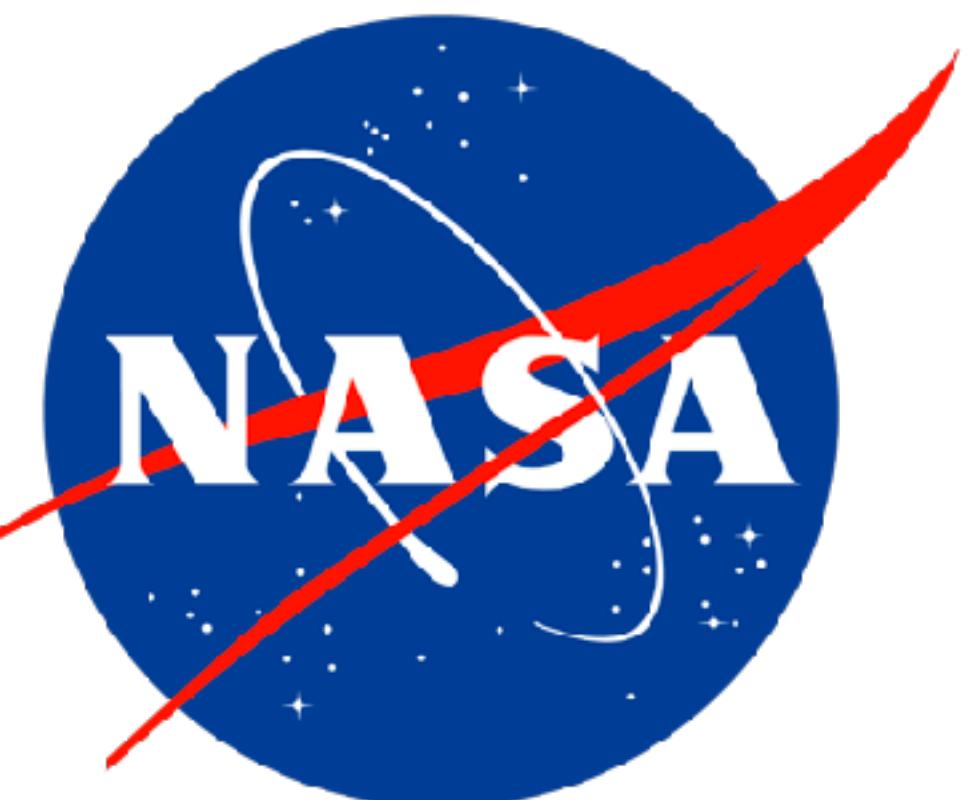

and how we use it to communicate the ways NASA's mission extends beyond space exploration to study the Earth.

Alex Gurvich, Ph.D.

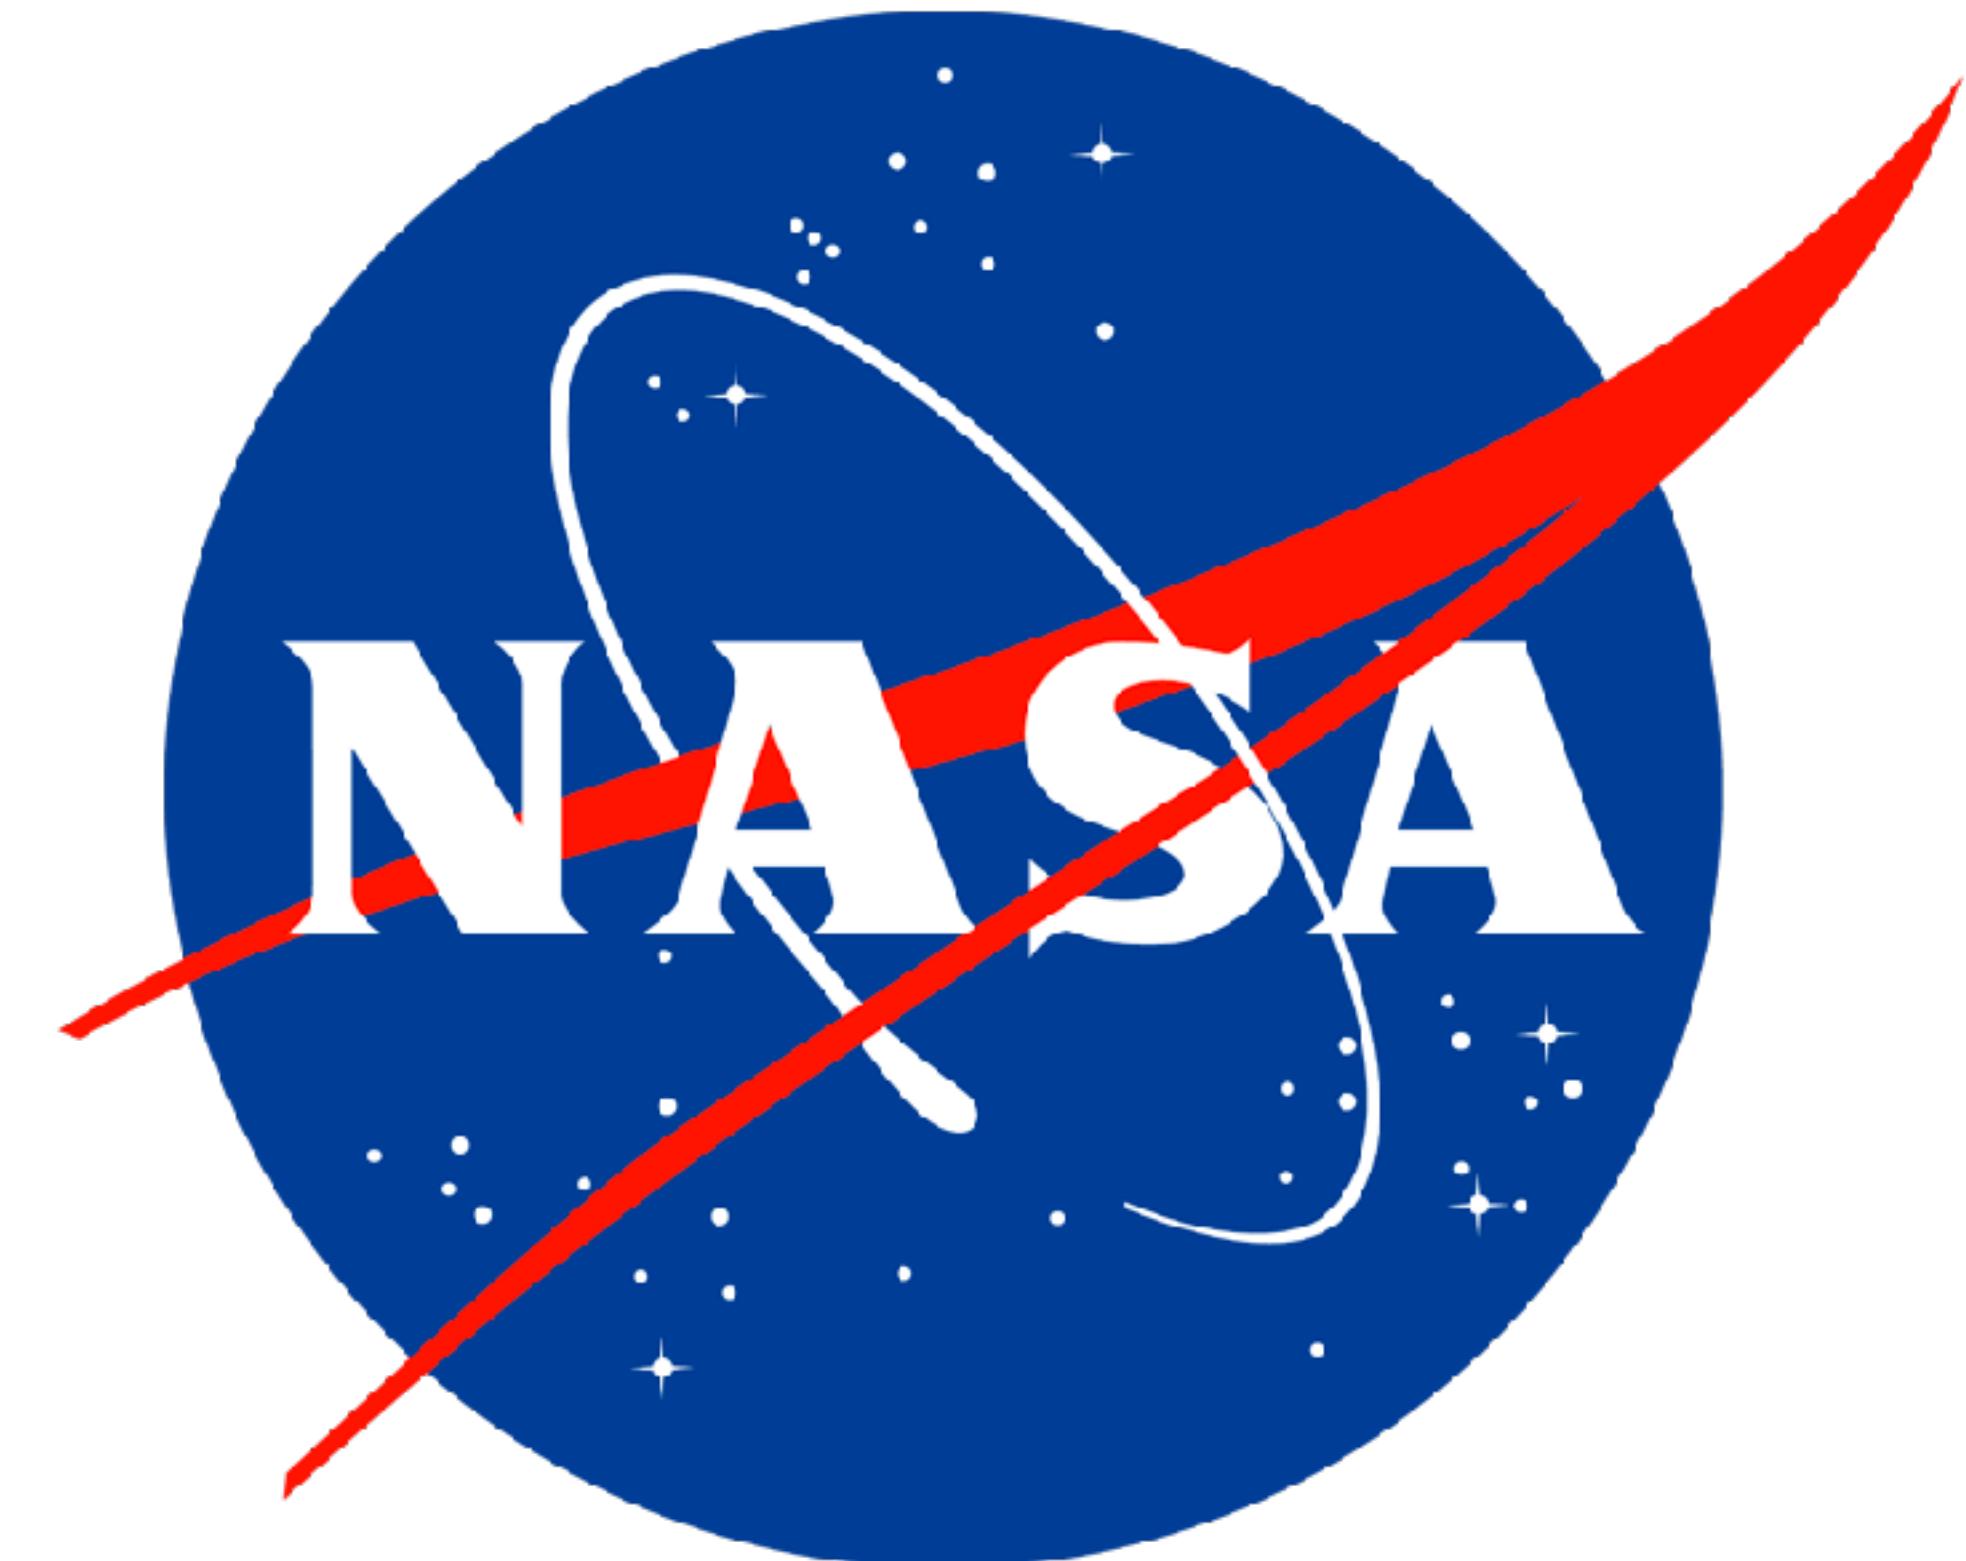

[www.alexbgurvi.ch](http://www.alexbgurvi.ch)

Senior Graphics Designer and **Visualization Specialist**

at NASA Goddard Space Flight Center's Scientific Visualization Studio

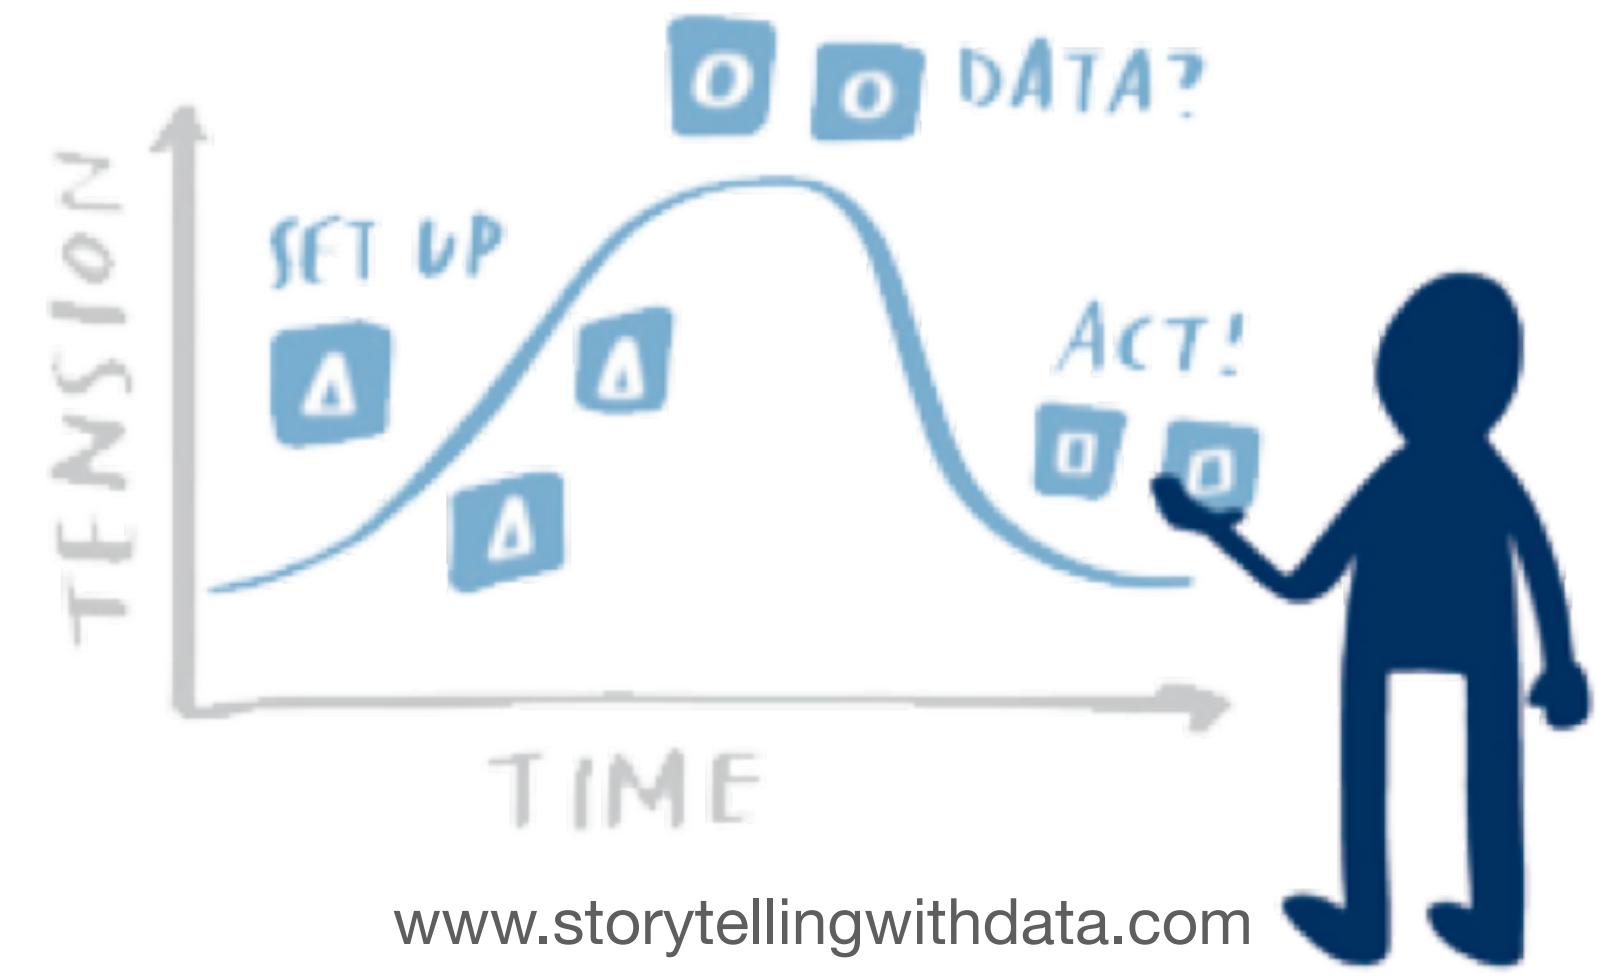

**Disclaimer:** this presentation represents my perspective and opinions and **not the official position(s) of NASA.**

Storytelling with data is a **focused and intentional** way to **communicate key features** in data.

storytelling  data 

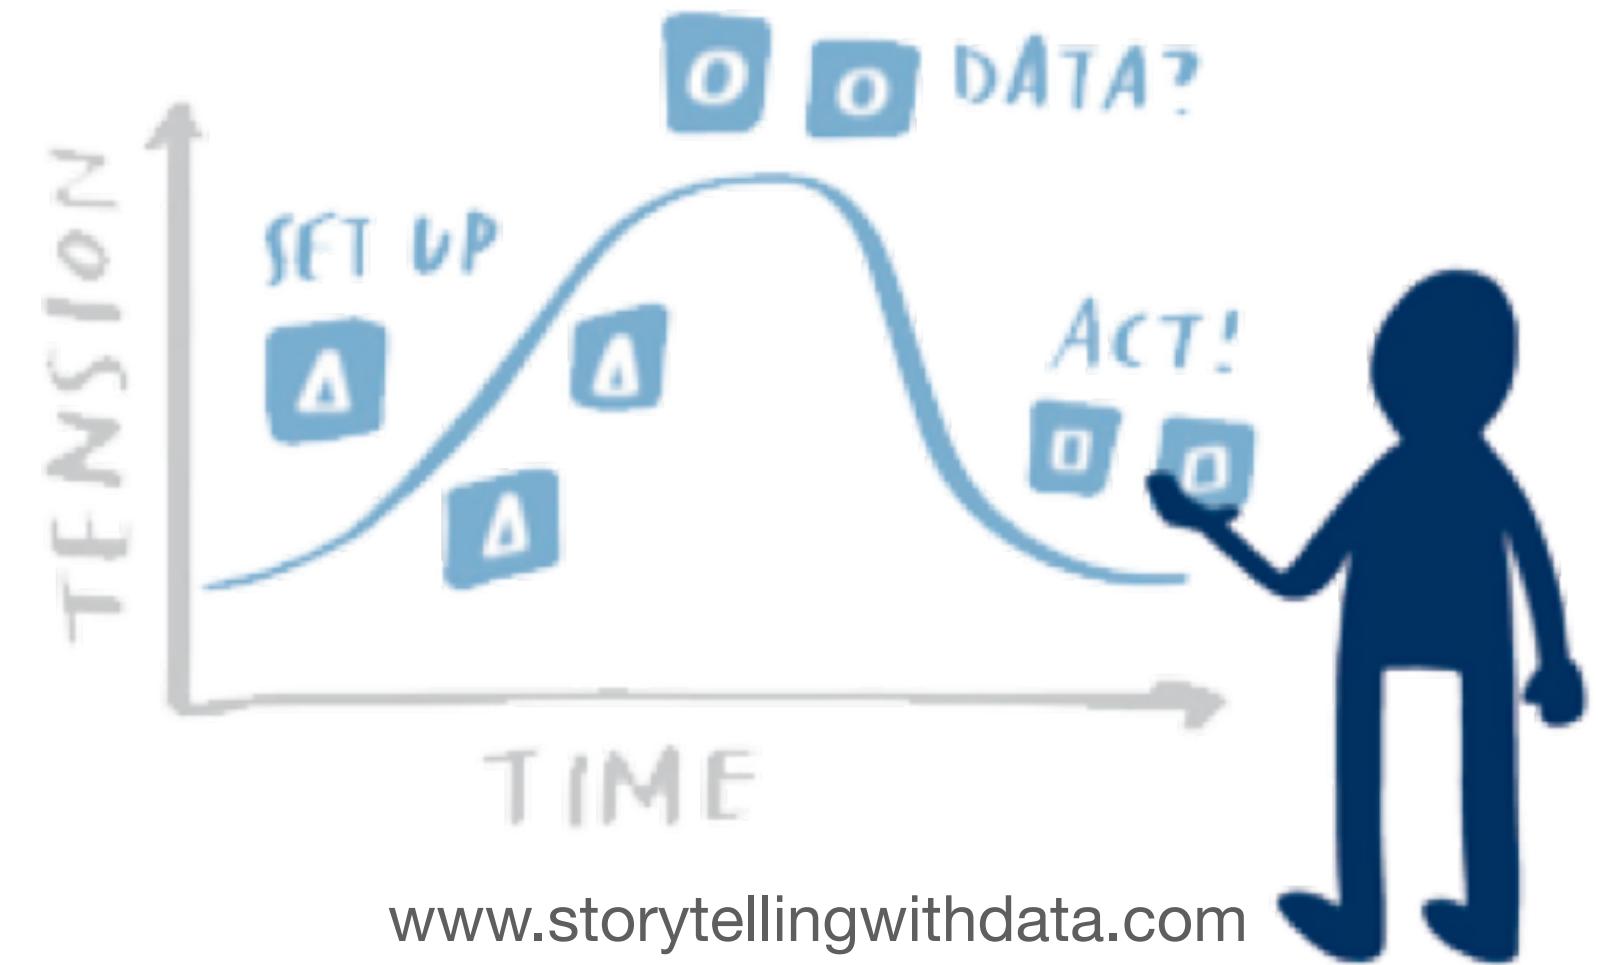

Storytelling with data is a **focused and intentional** way to **communicate key features** in data.

## Visualizations are rarely both **exploratory and explanatory**.

- Exploratory visualizations are the **tools we use for discovery**, and are often **rougher, more complicated**, and **not always well-suited** for explaining the final result.

storytelling  data

Storytelling with data is a **focused and intentional** way to **communicate key features** in data.

## Visualizations are rarely both **exploratory and explanatory**.

- Exploratory visualizations are the **tools we use for discovery**, and are often **rougher, more complicated**, and **not always well-suited** for explaining the final result.

## Time spent doesn't automatically equal impact

- The **amount of time spent** on data processing and analysis often dwarfs the amount of time spent **preparing the data for presentation**. However, all anyone else sees is the final plot; we do **ourselves and our audience a disservice** to not spend additional time optimizing the presentation.

## Data has no value on its own

- Data science empowers decision makers to **make more informed decisions**. Our role as data scientists is to **act as interpreters** by efficiently and clearly **communicating the story** hidden inside data.

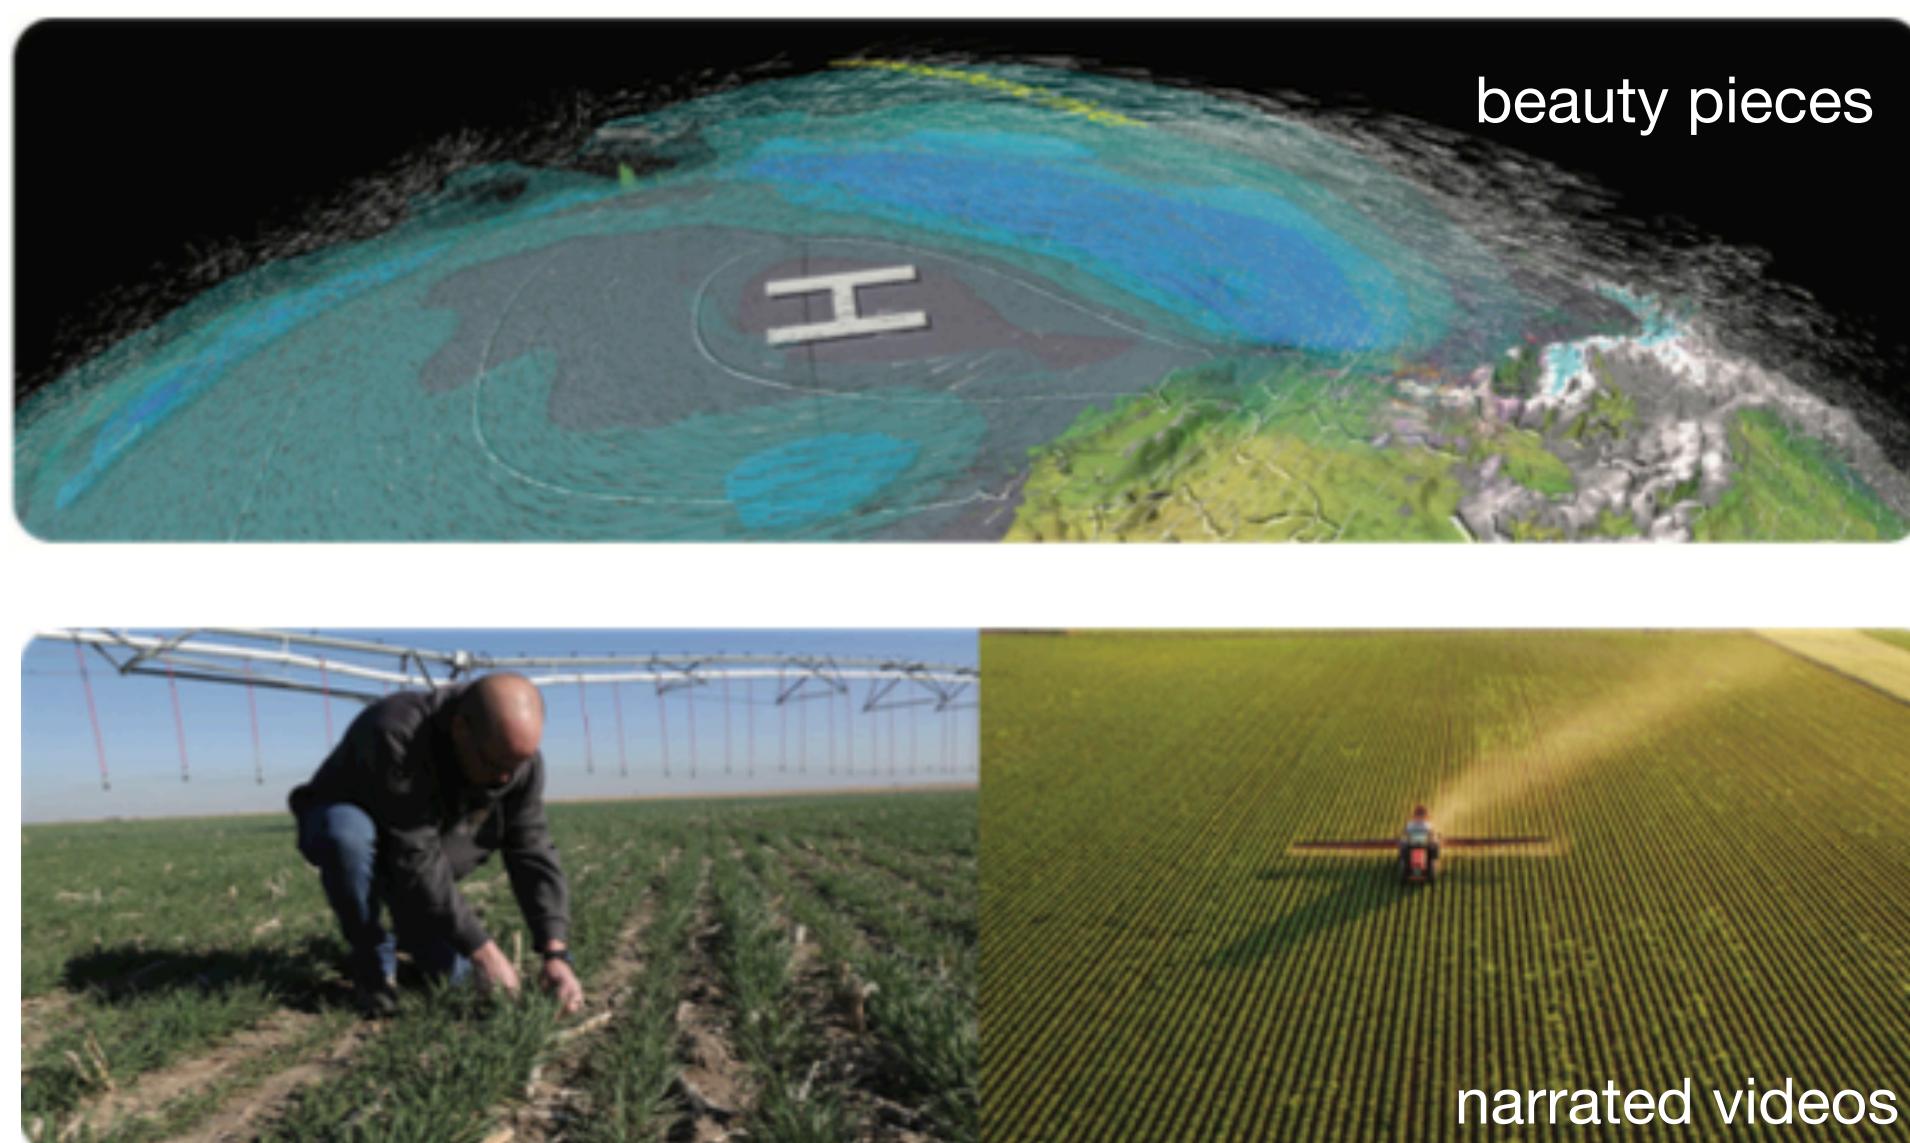

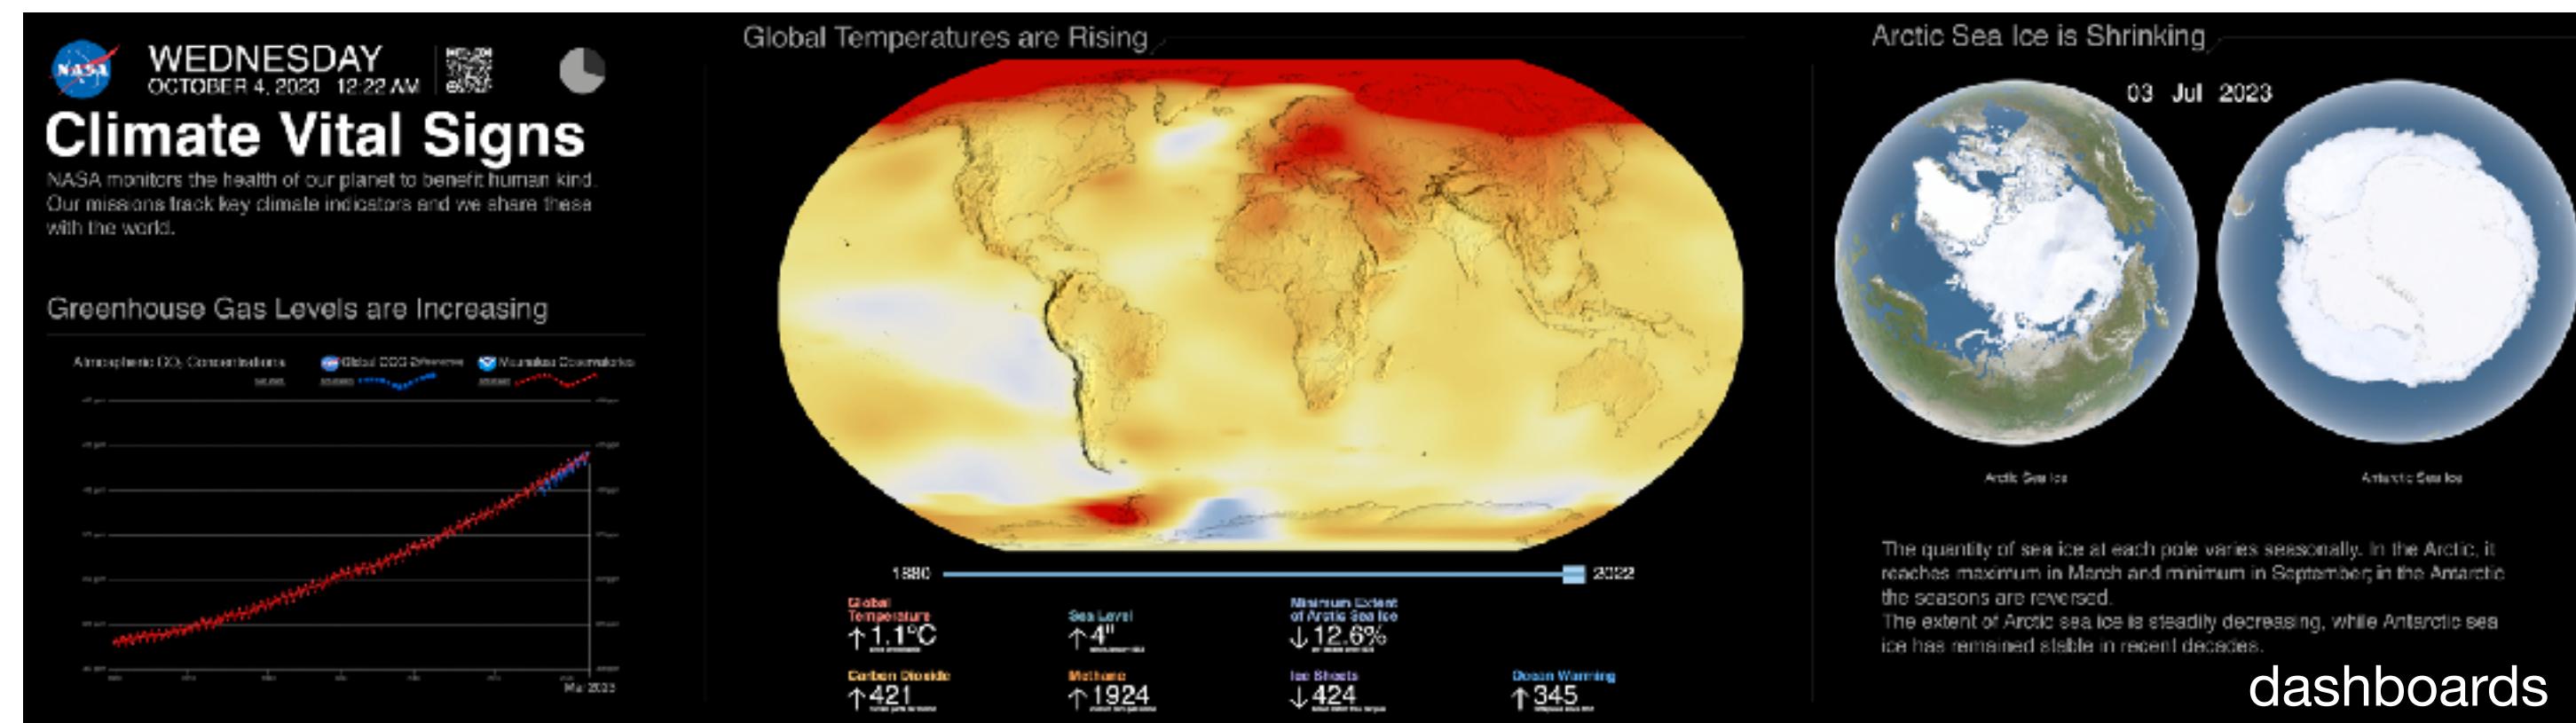

The mission of NASA's **Earth Information Center** is to put the vast quantities of available Earth data **directly into the hands of decision makers**.

# The EIC has two components:

1. a **physical exhibit** showcasing how NASA's Earth observing fleet of satellites **collects actionable data** at NASA HQ.
  2. a **website** highlighting the **impact of NASA data across nine focus areas**: agriculture, air quality, biodiversity, disasters, energy, greenhouse gases, sea level rise, water resources, and wildfires. [go.nasa.gov/EIC](http://go.nasa.gov/EIC)

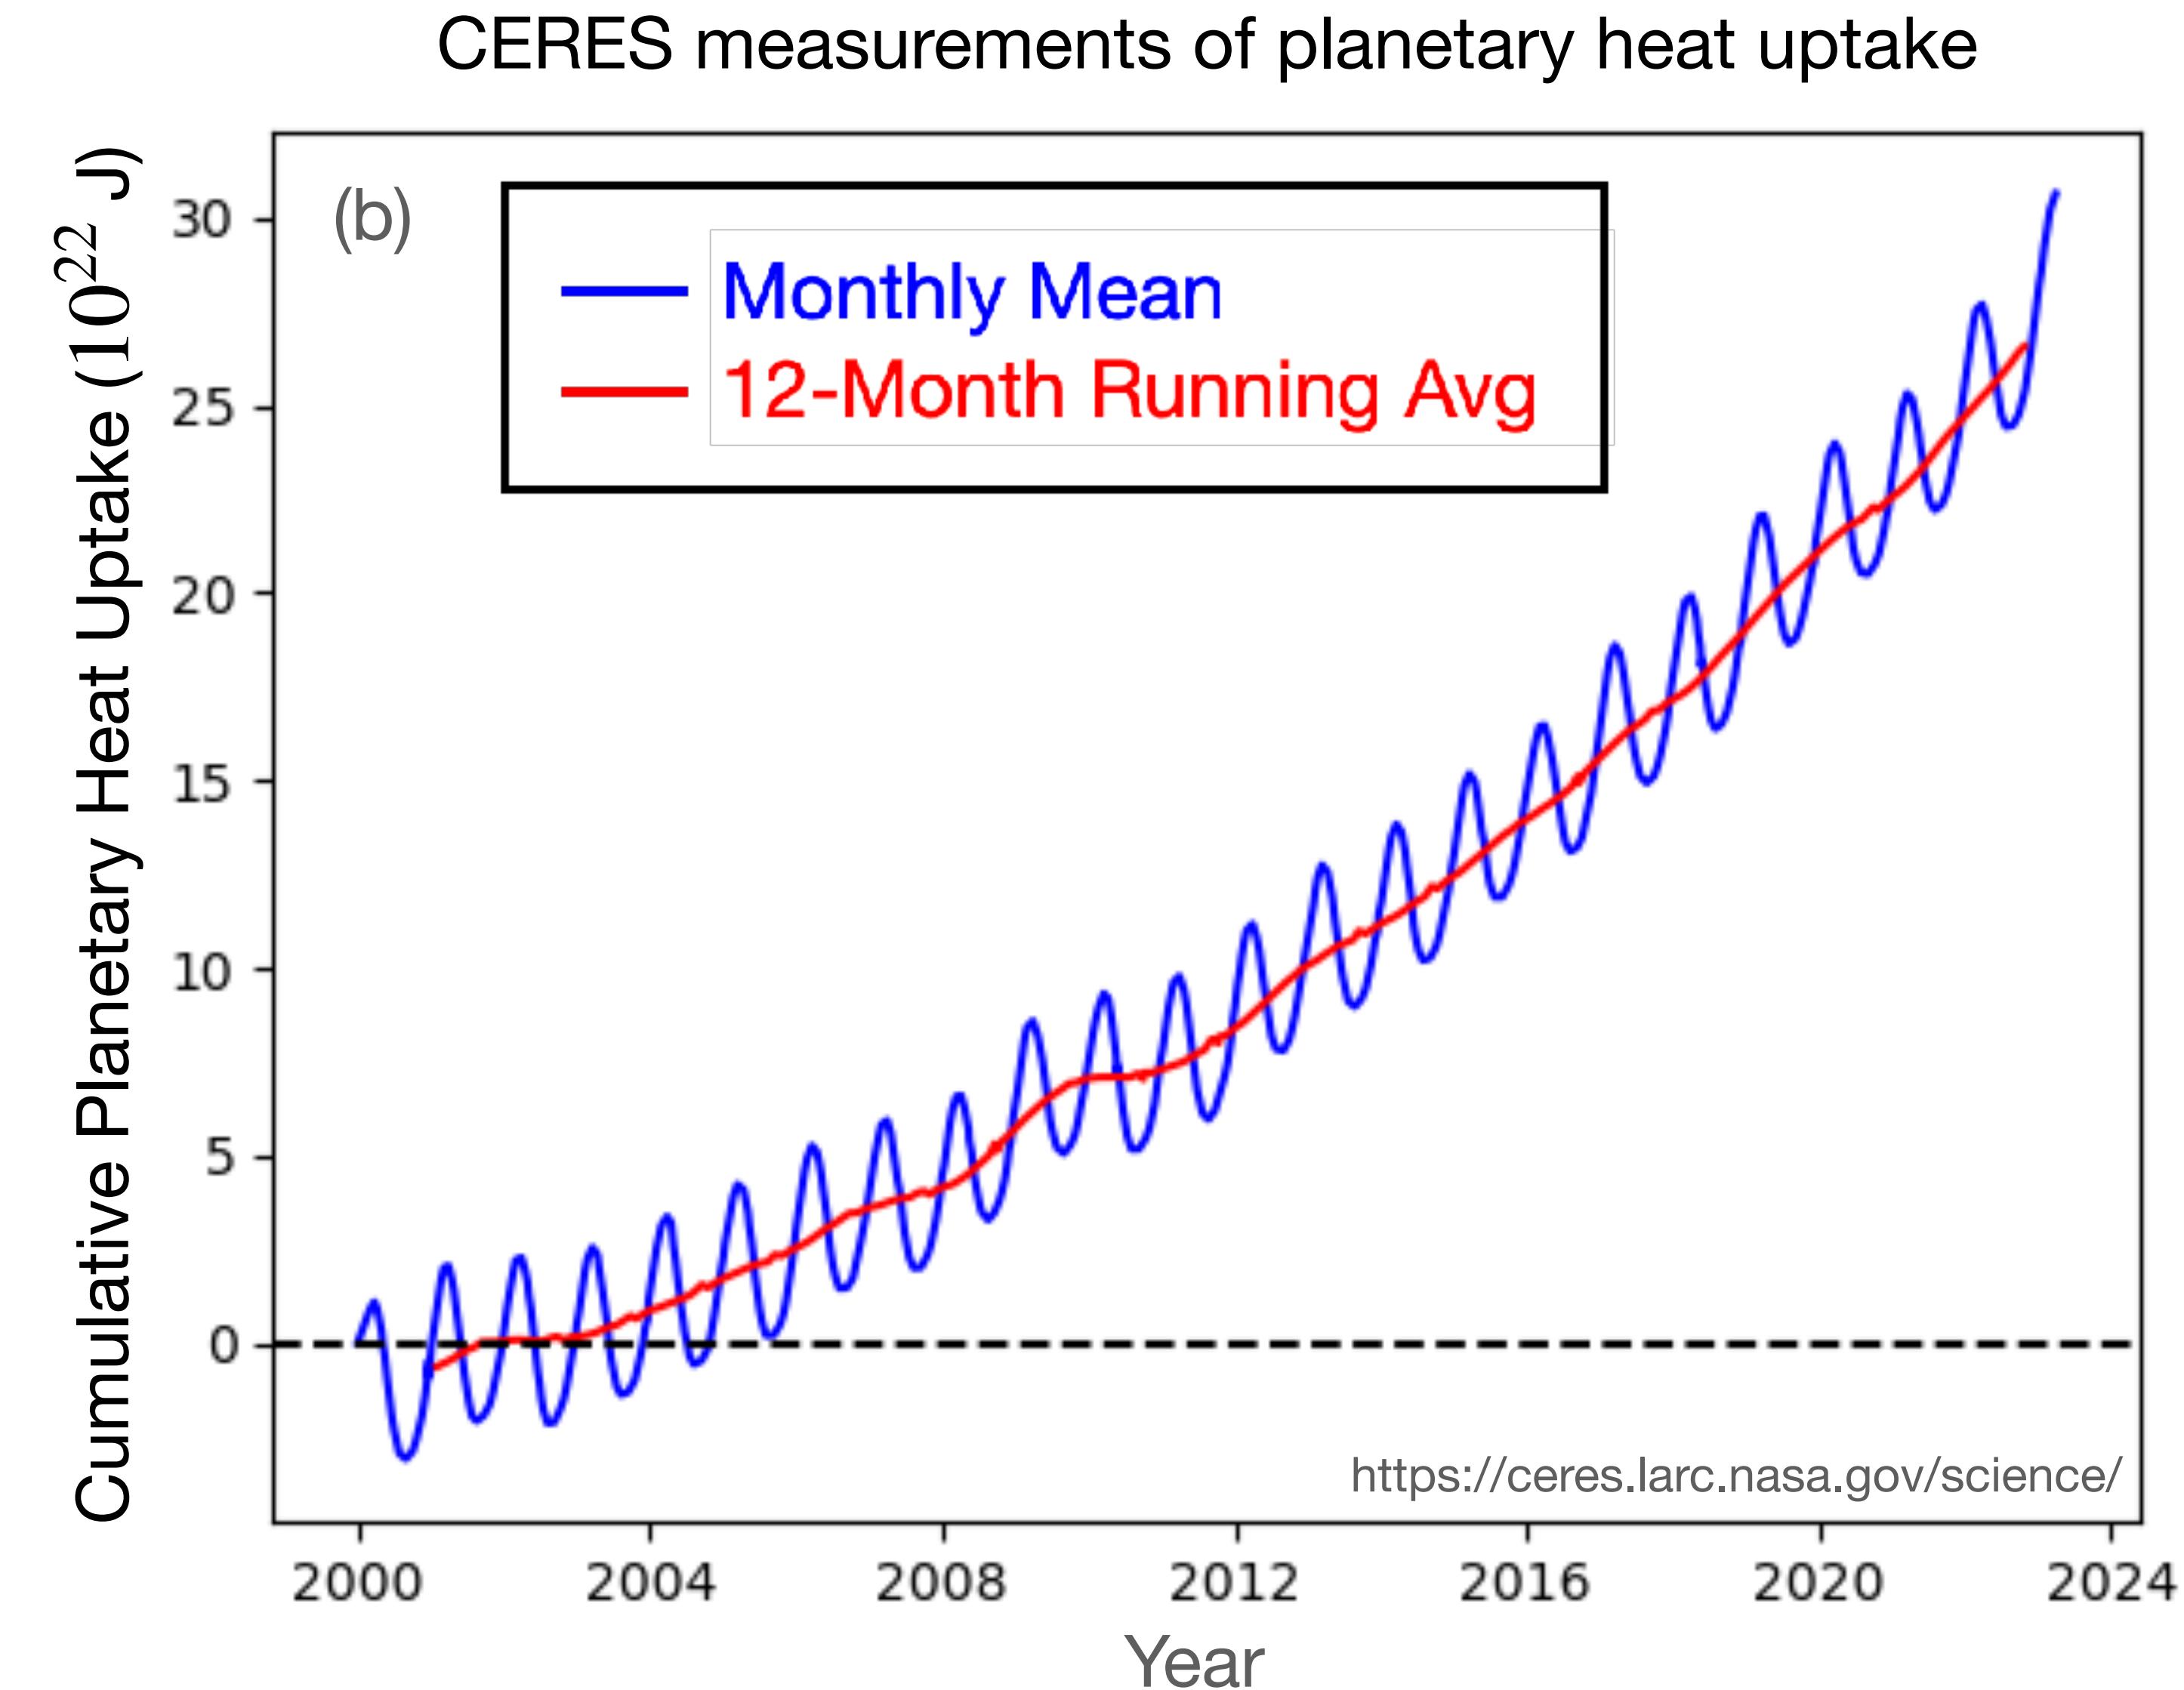

# Where does storytelling come in?

Including elements of storytelling in our dashboards, beauty pieces, and narrated videos helps us **convey the impact** of NASA Earth science data in a memorable and compelling way.

Unfocused visualization can make readers **confused** as they **attempt to figure out** what's being plotted.

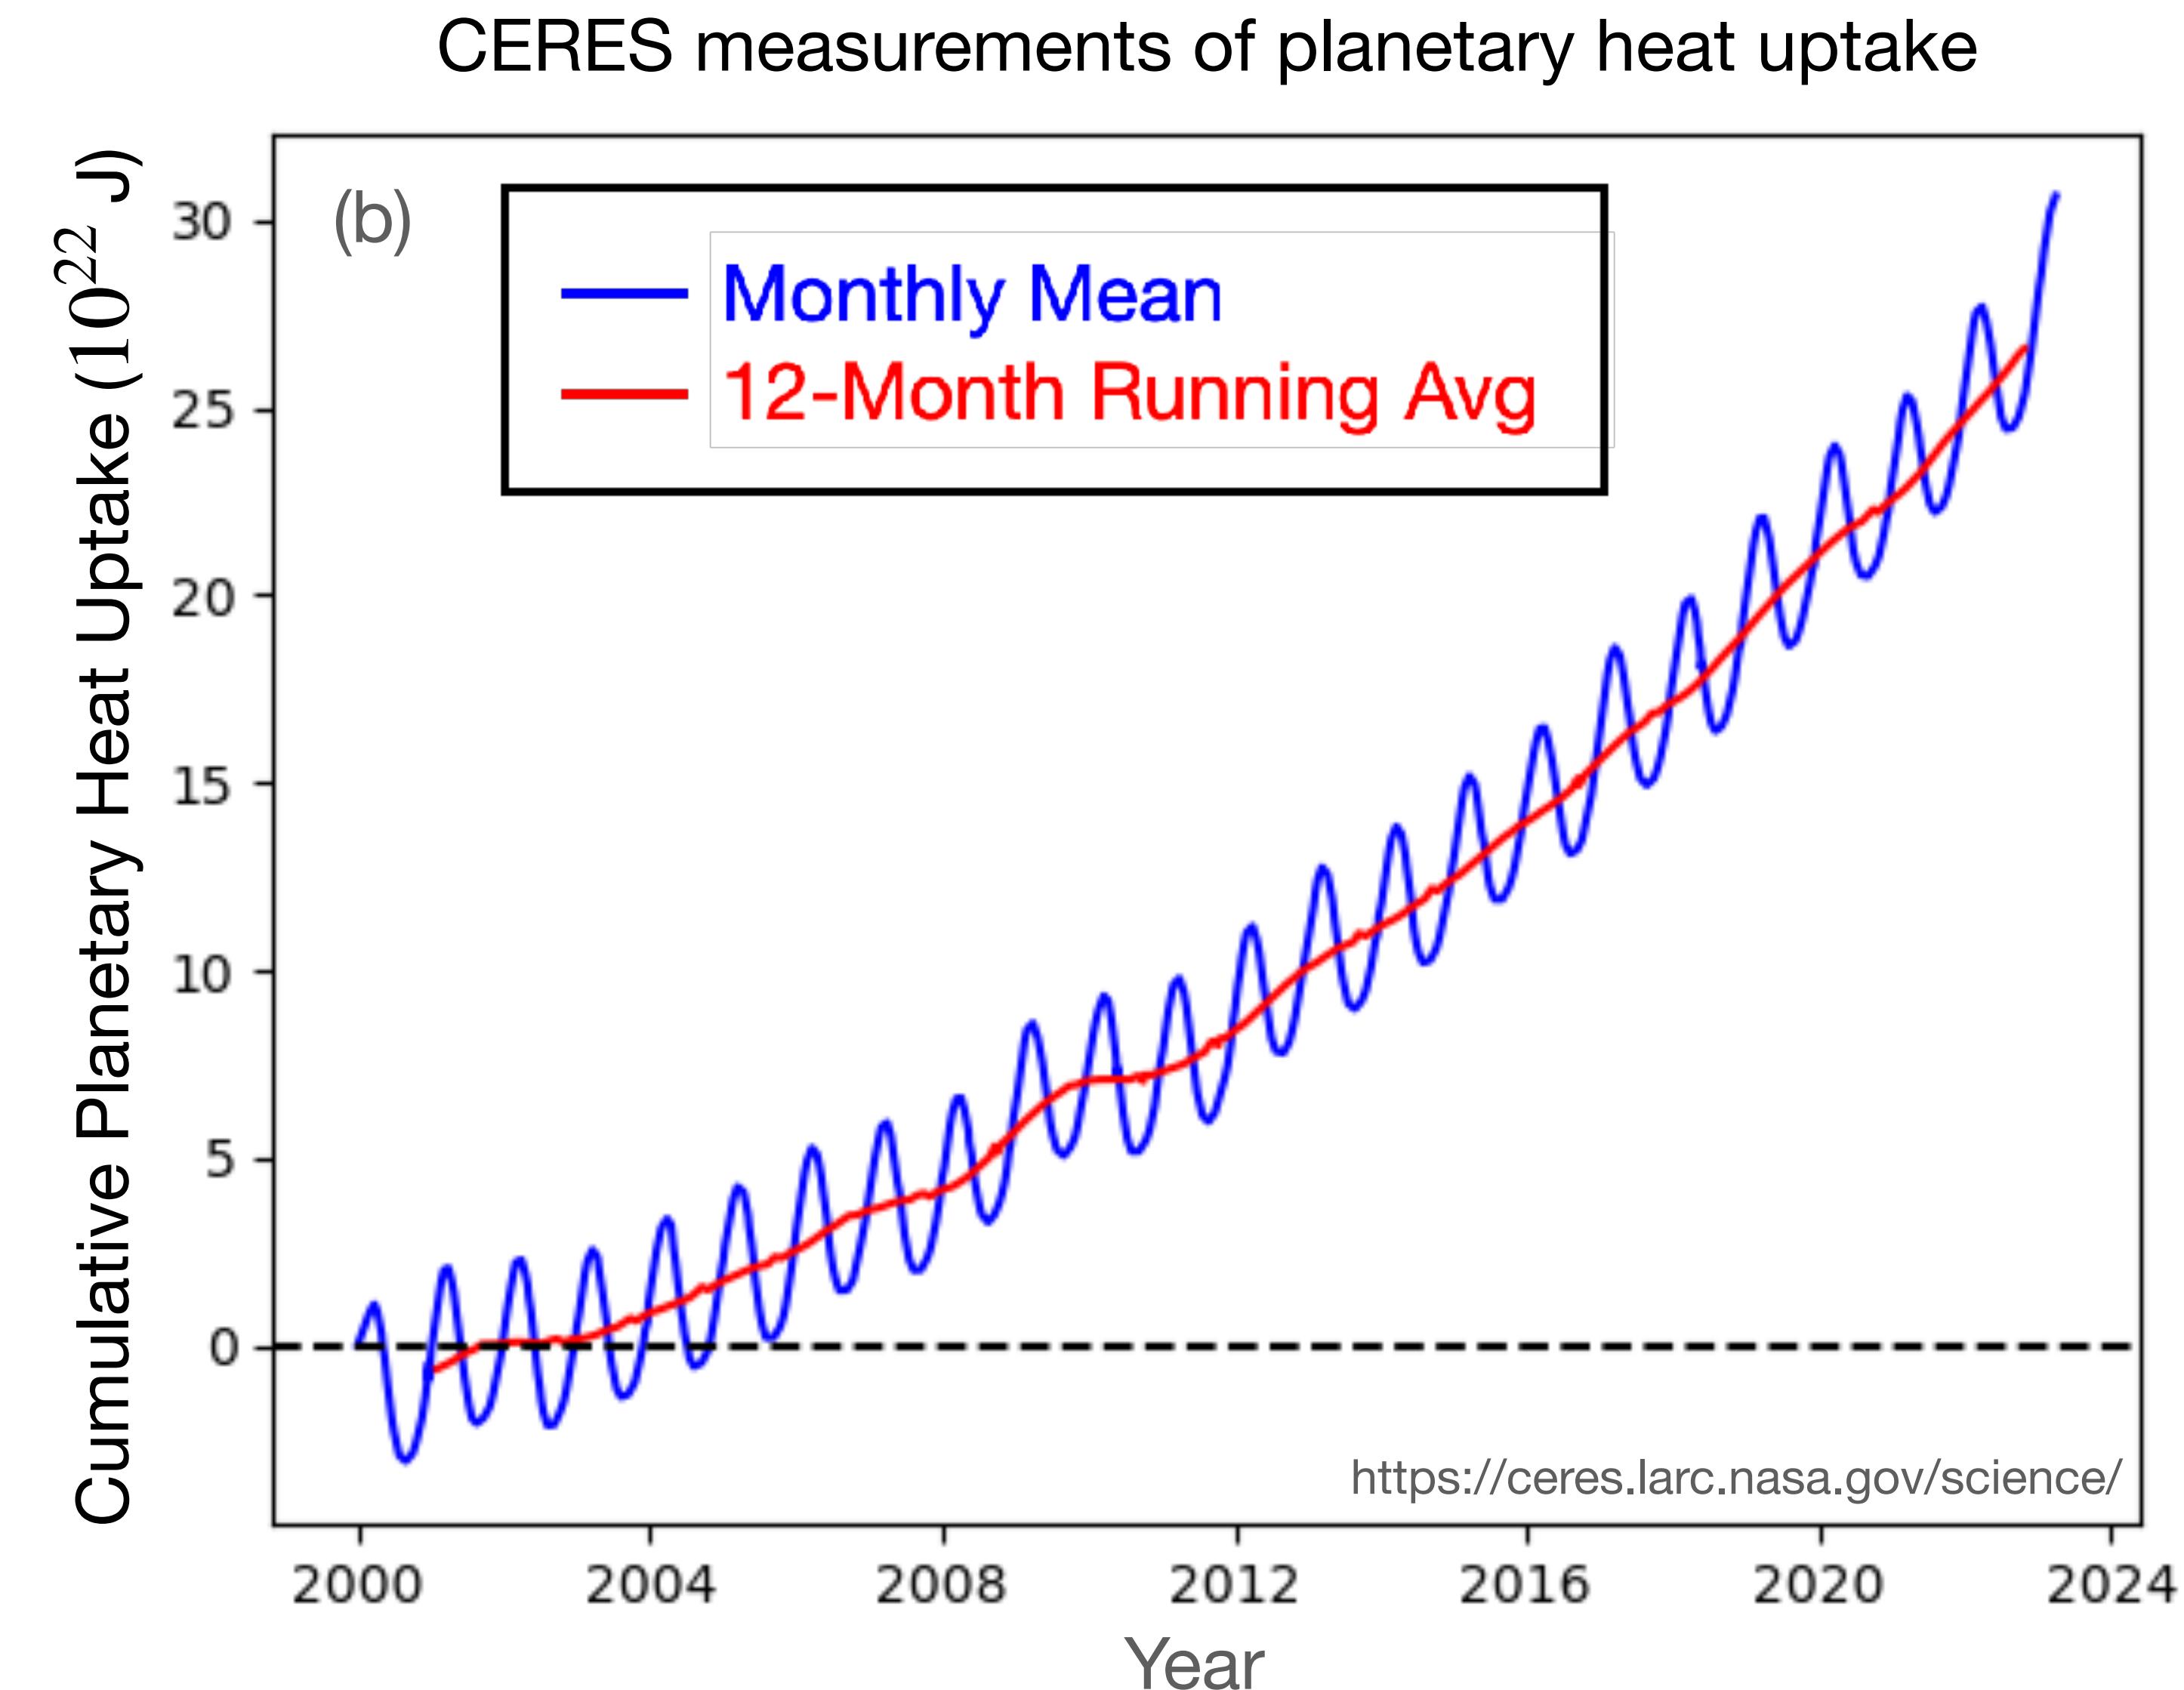

**Why doesn't this visualization work?**

Unfocused visualization can make readers **confused** as they **attempt to figure out** what's being plotted.

## Why doesn't this visualization work?

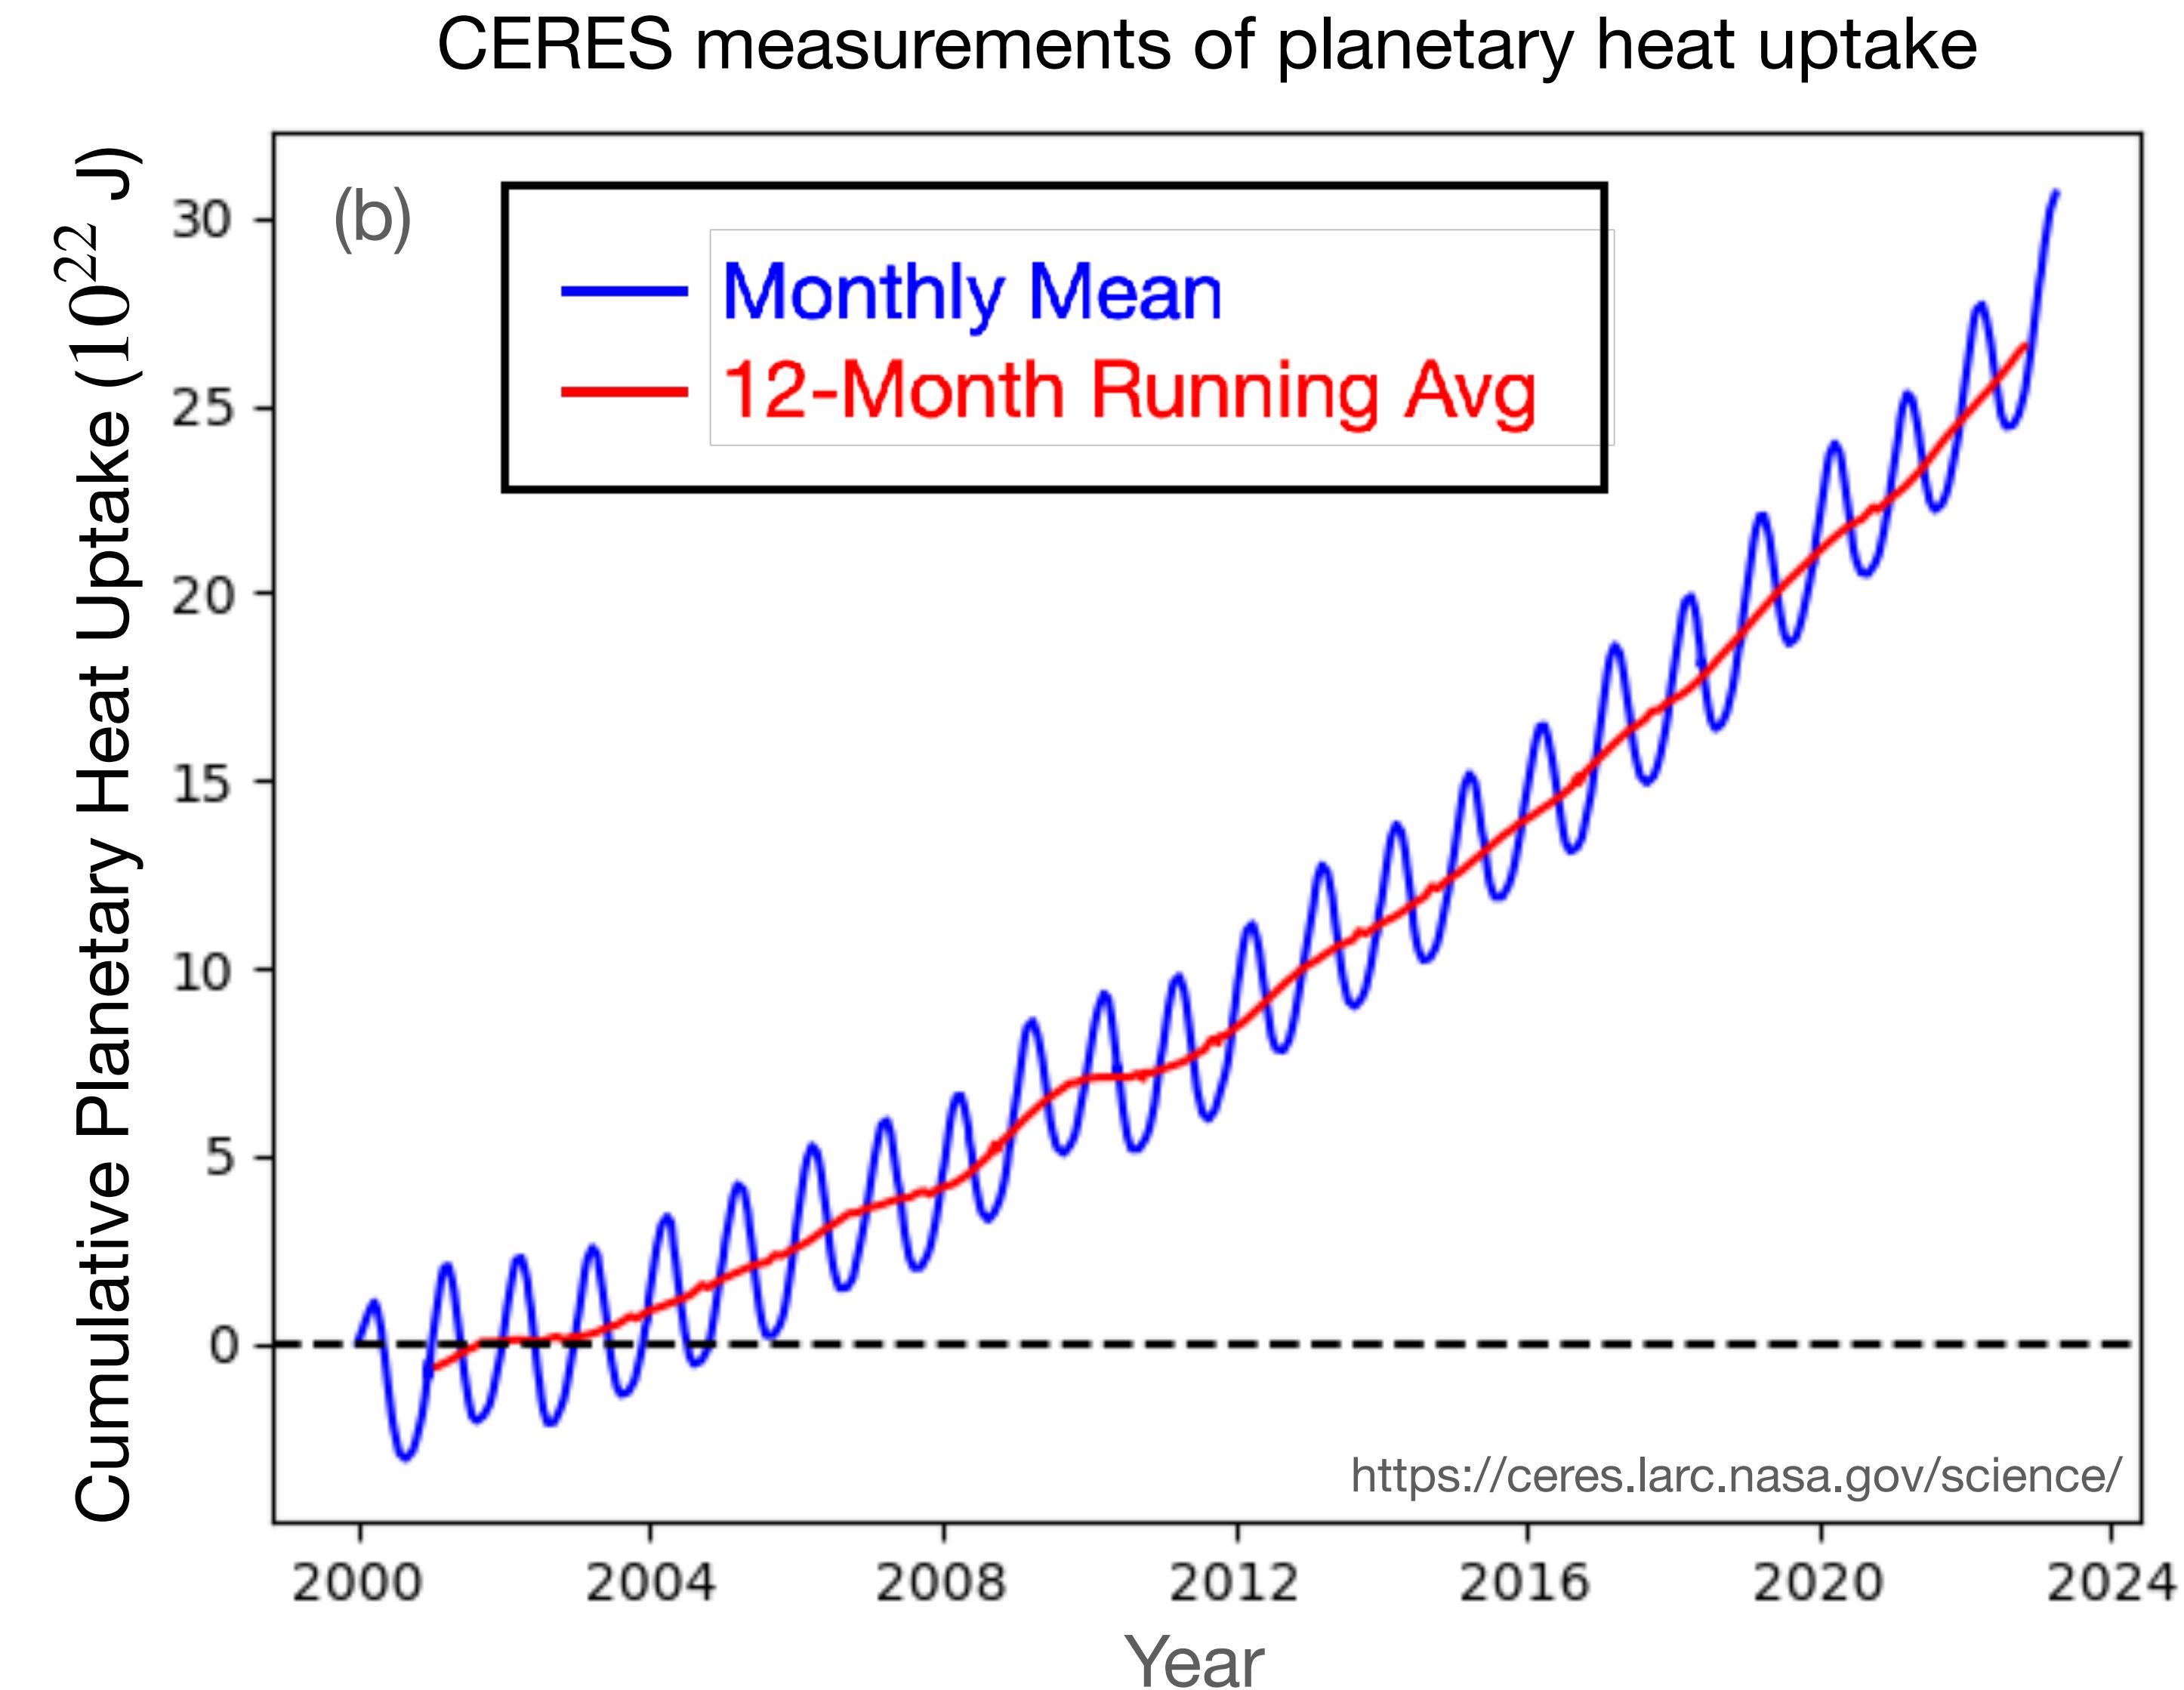

- It relies on confusing jargon like **CERES** and **planetary heat uptake**.

Unfocused visualization can make readers **confused** as they **attempt to figure out** what's being plotted.

## Why doesn't this visualization work?

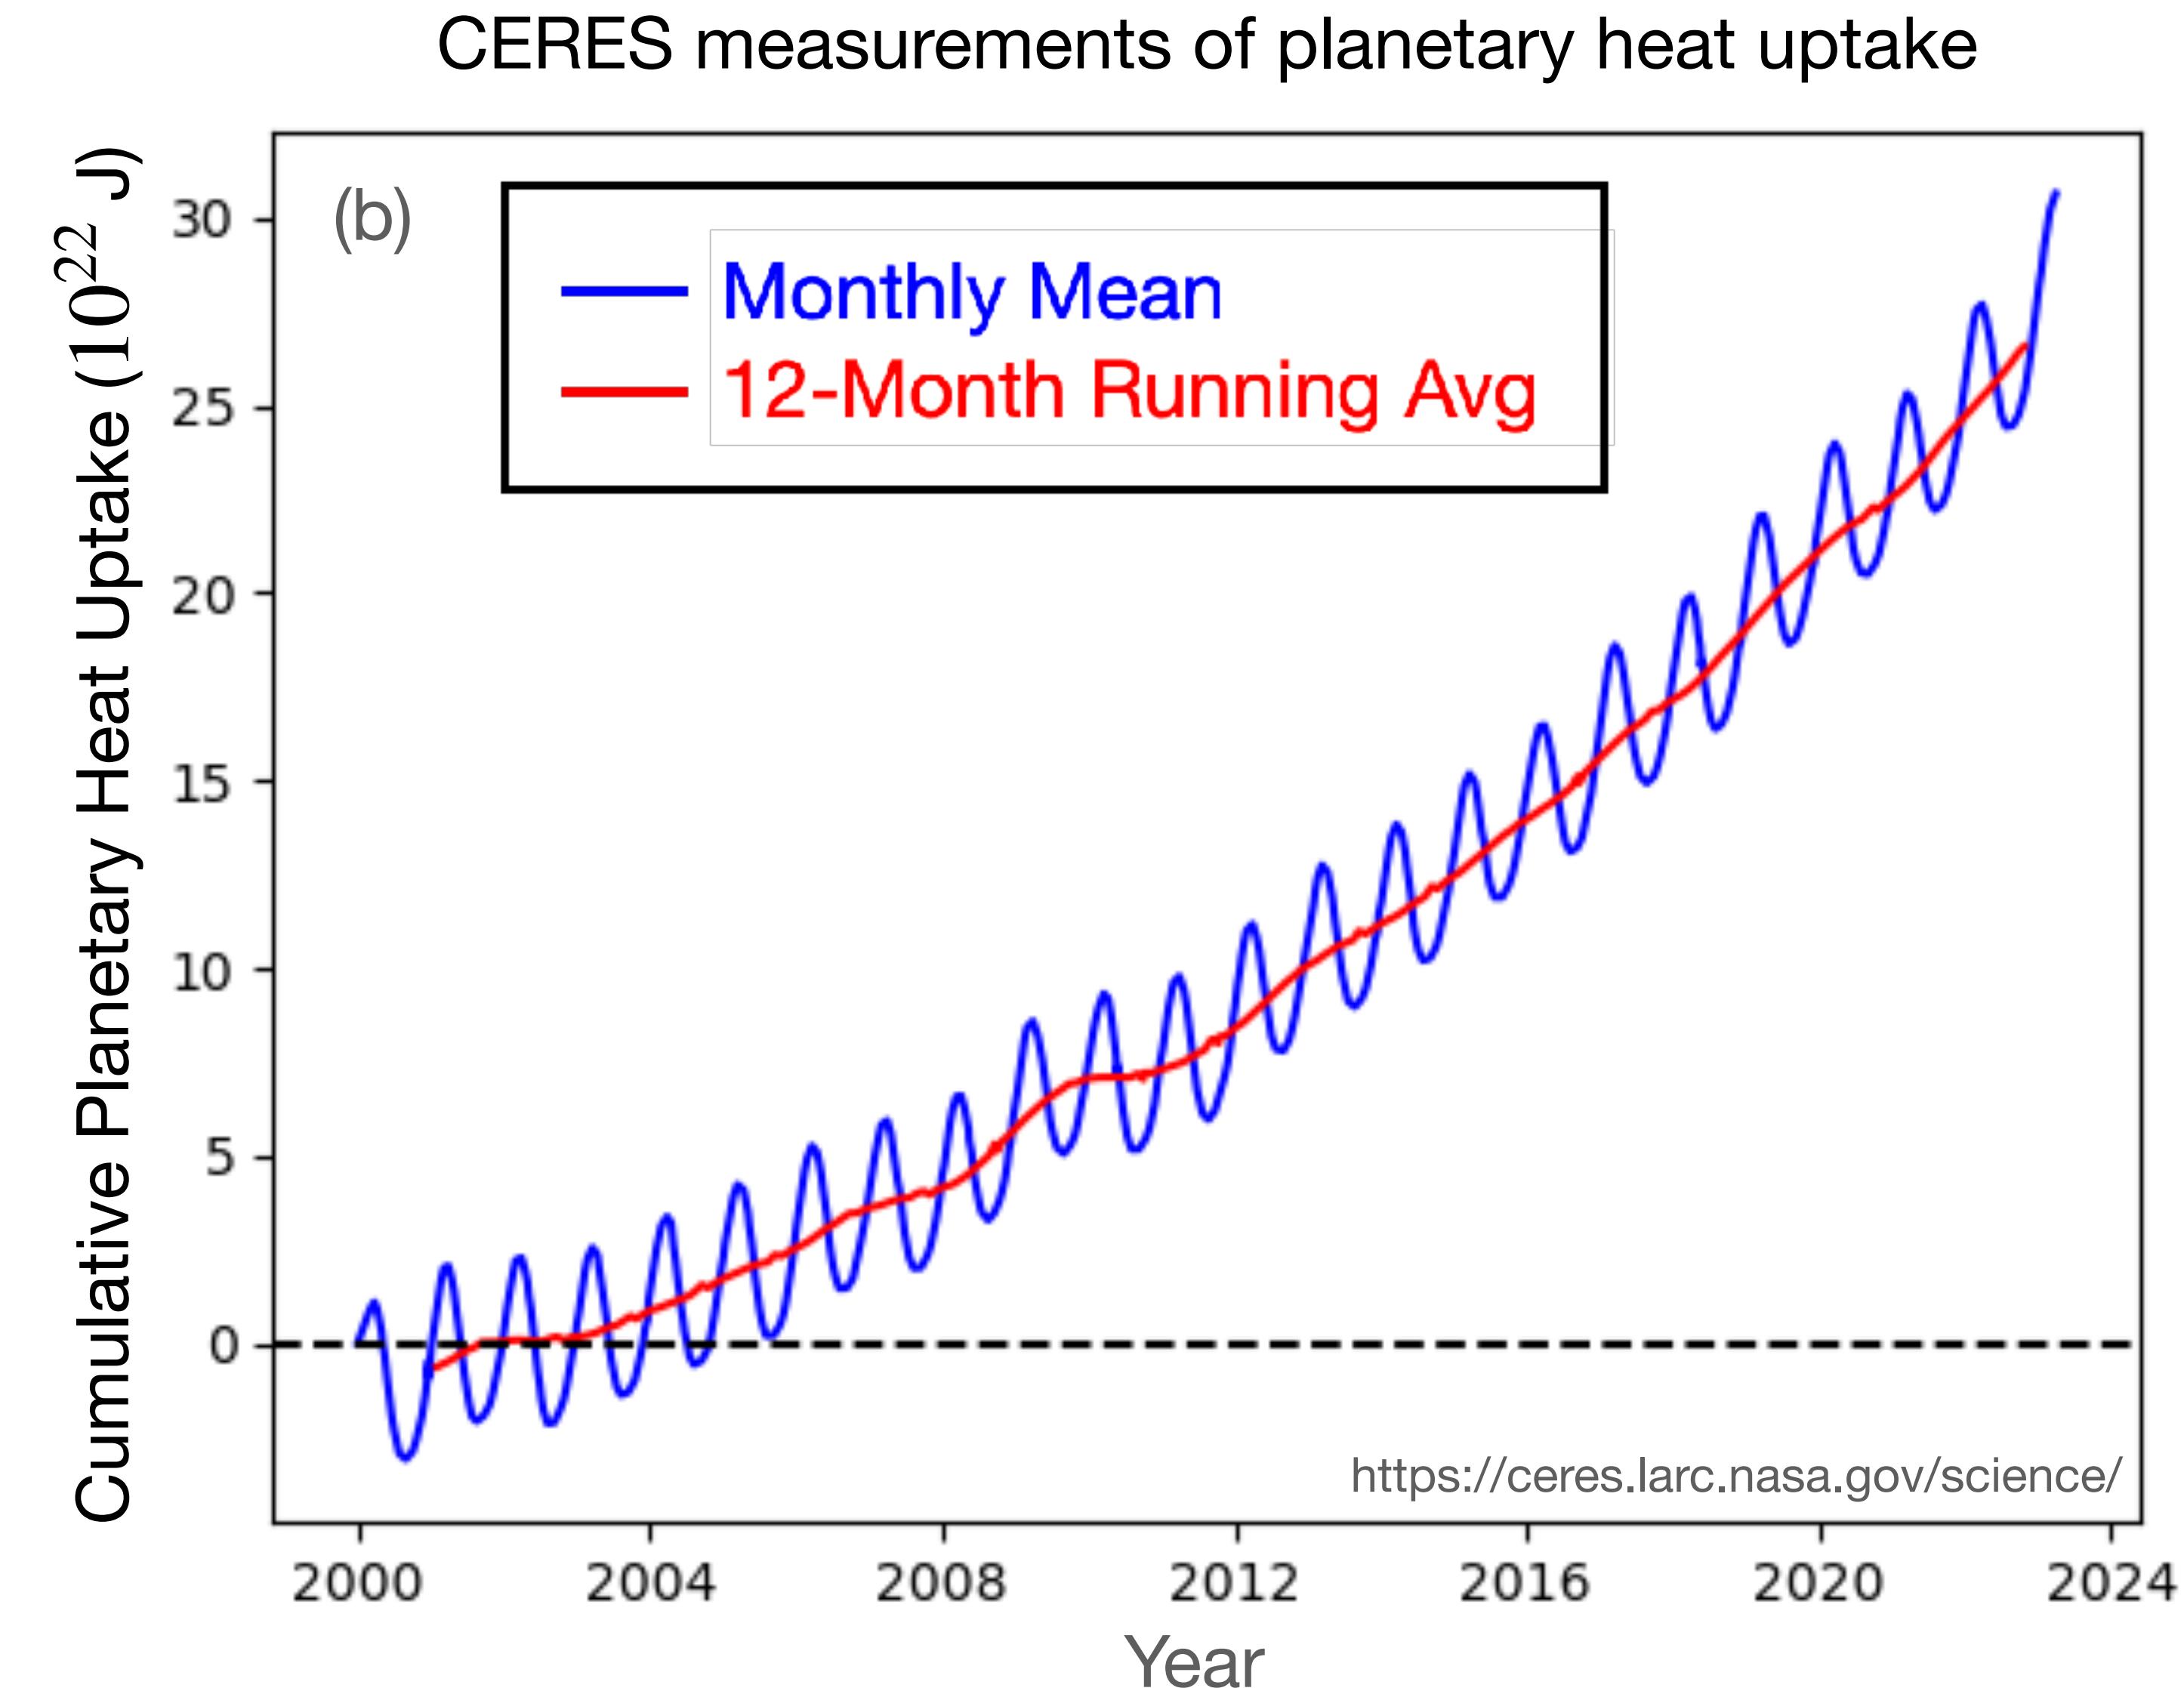

- It relies on confusing jargon like **CERES** and **planetary heat uptake**.
- There's no clear takeaway and the **data is left to speak for itself**.

Unfocused visualization can make readers **confused** as they **attempt to figure out** what's being plotted.

## Why doesn't this visualization work?

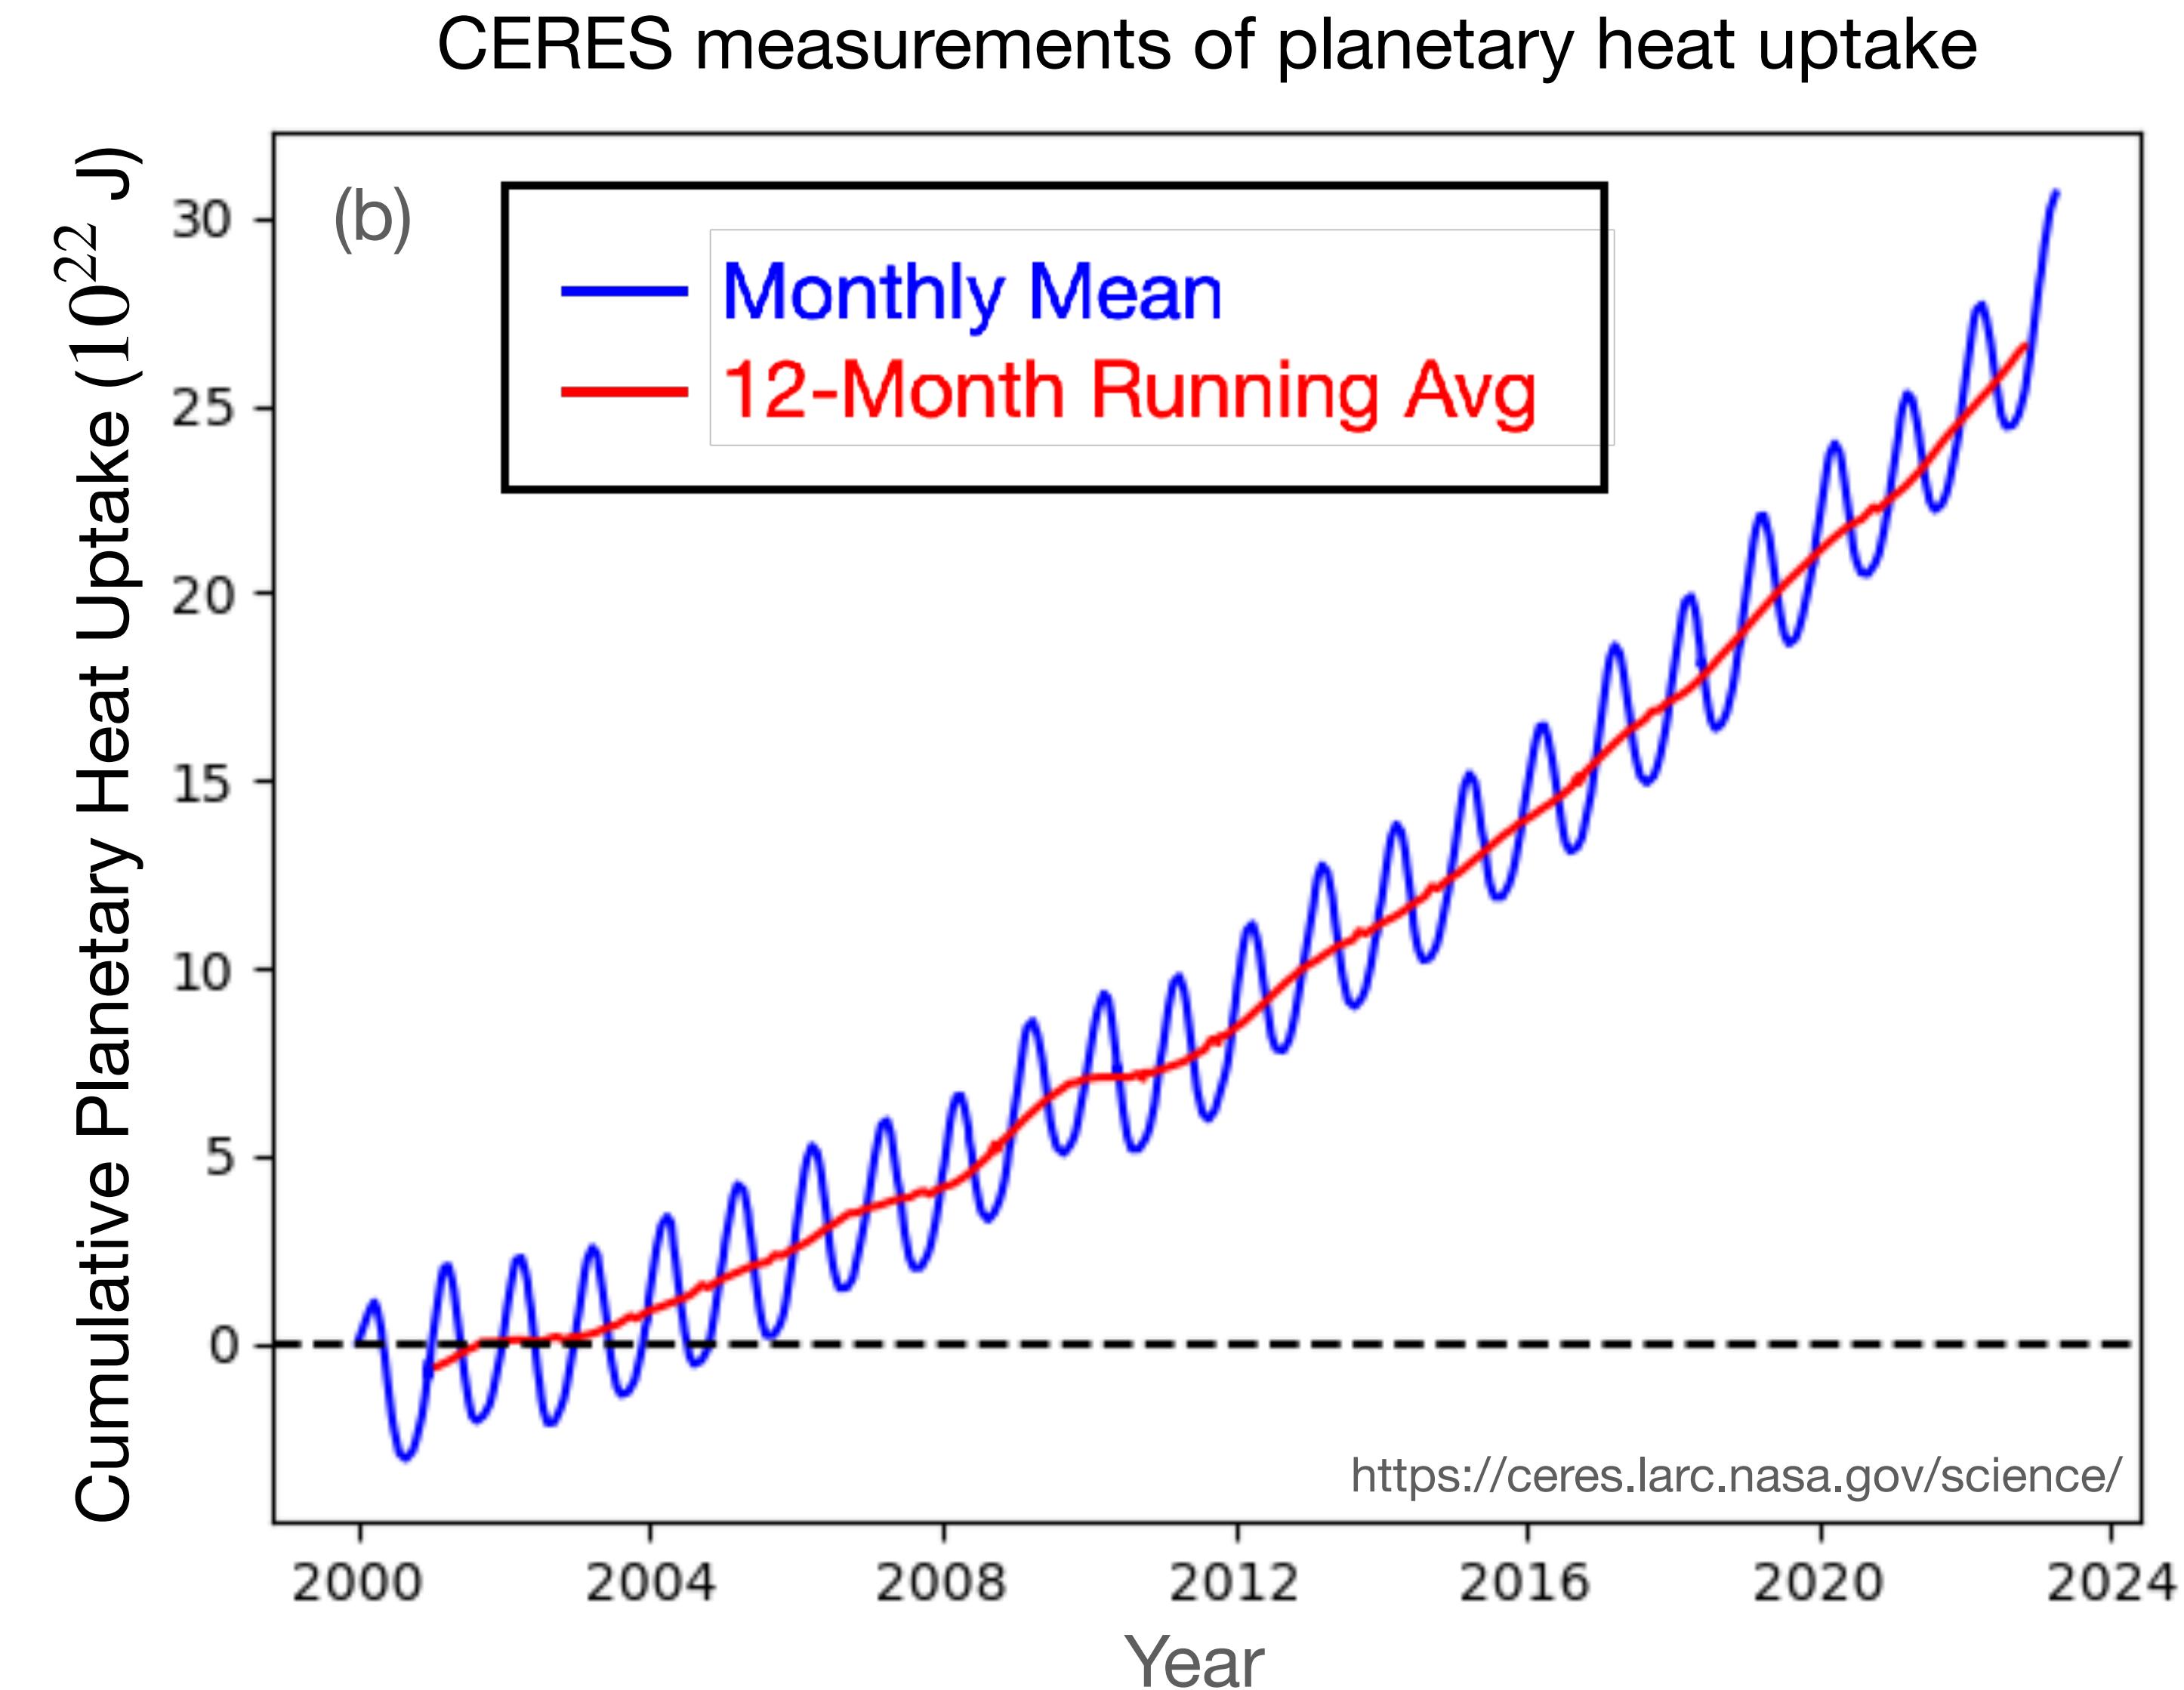

- It relies on confusing jargon like **CERES** and **planetary heat uptake**.
- There's no clear takeaway and the **data is left to speak for itself**.
- The abstract y-axis units make it **difficult to interpret the significance**.

Unfocused visualization can make readers **confused** as they **attempt to figure out** what's being plotted.

## Why doesn't this visualization work?

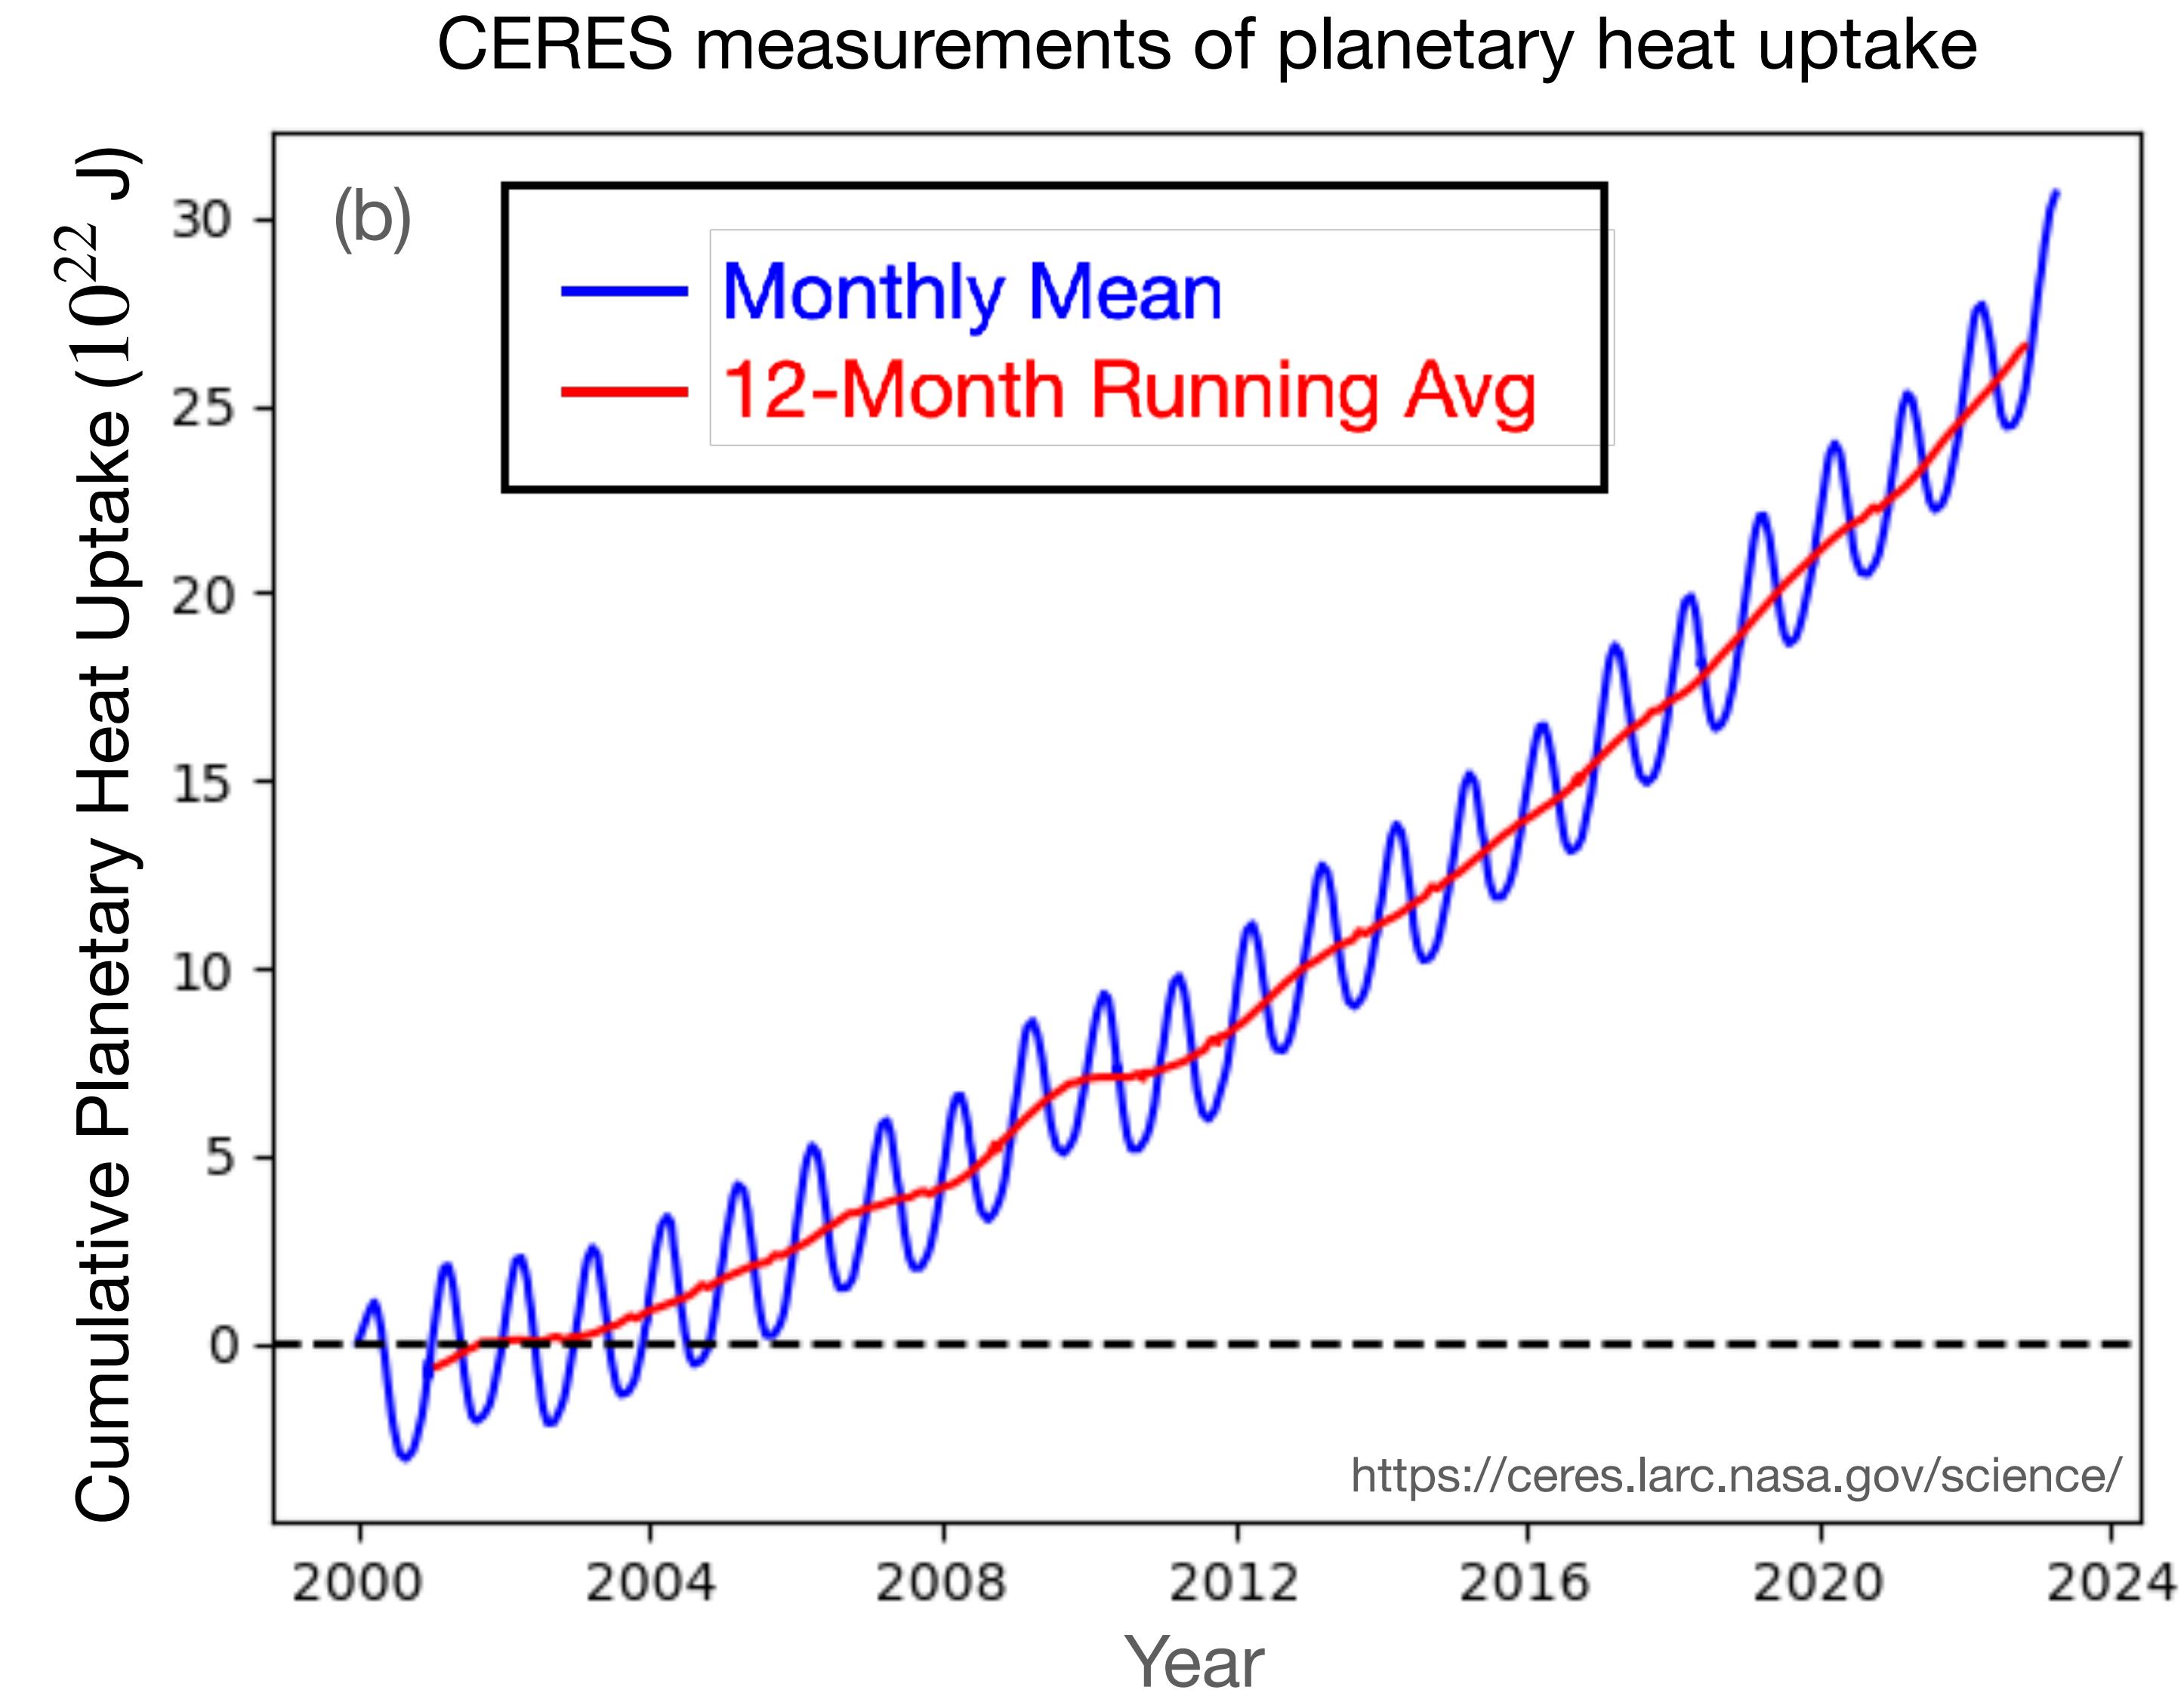

- It relies on confusing jargon like **CERES** and **planetary heat uptake**.
- There's no clear takeaway and the **data is left to speak for itself**.
- The abstract y-axis units make it **difficult to interpret the significance**.
- If the reader is doing work to understand the plot **that's brain power not focusing on the takeaway** you want them to have.

Unfocused visualization can make readers **confused** as they **attempt to figure out** what's being plotted.

**Goal:** “NASA satellite data reveals the Earth’s energy budget is becoming increasingly out of balance.”

**What can we improve?**

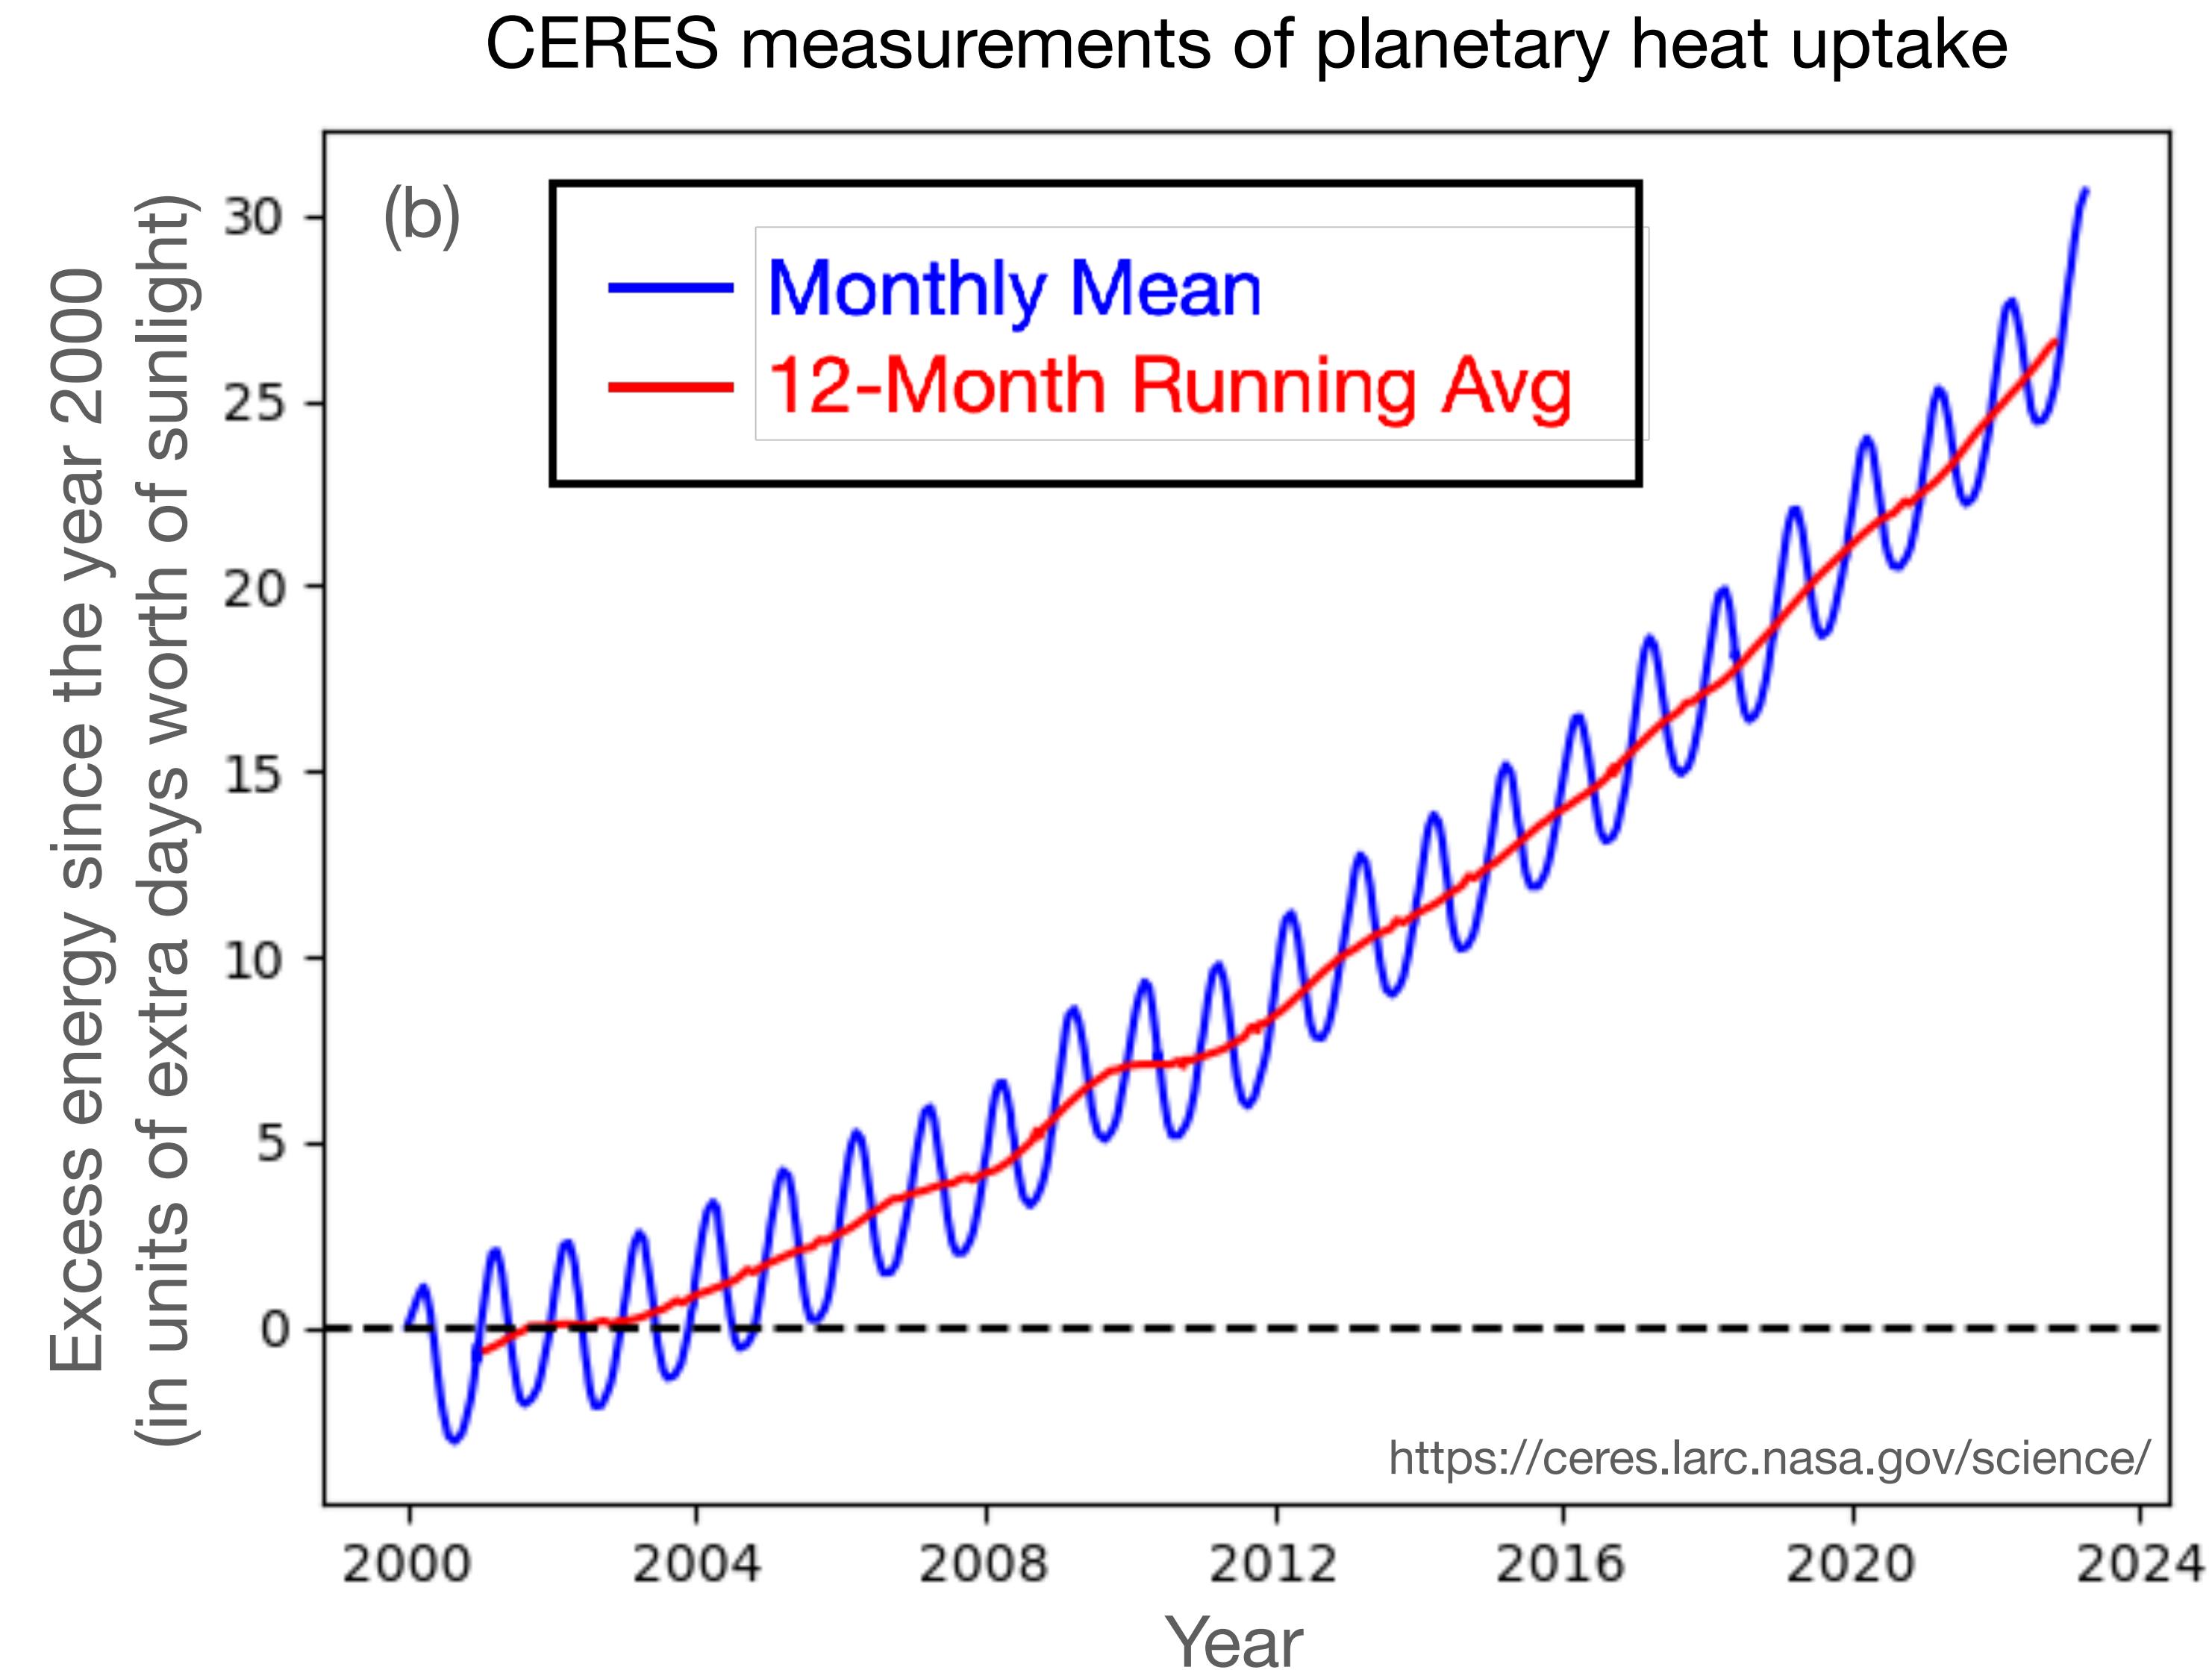

Unfocused visualization can make readers **confused** as they **attempt to figure out** what's being plotted.

**Goal:** “NASA satellite data reveals the Earth’s energy budget is becoming increasingly out of balance.”

### What can we improve?

- Unintuitive units add **additional layers of abstraction** to convey the magnitude of the effect.

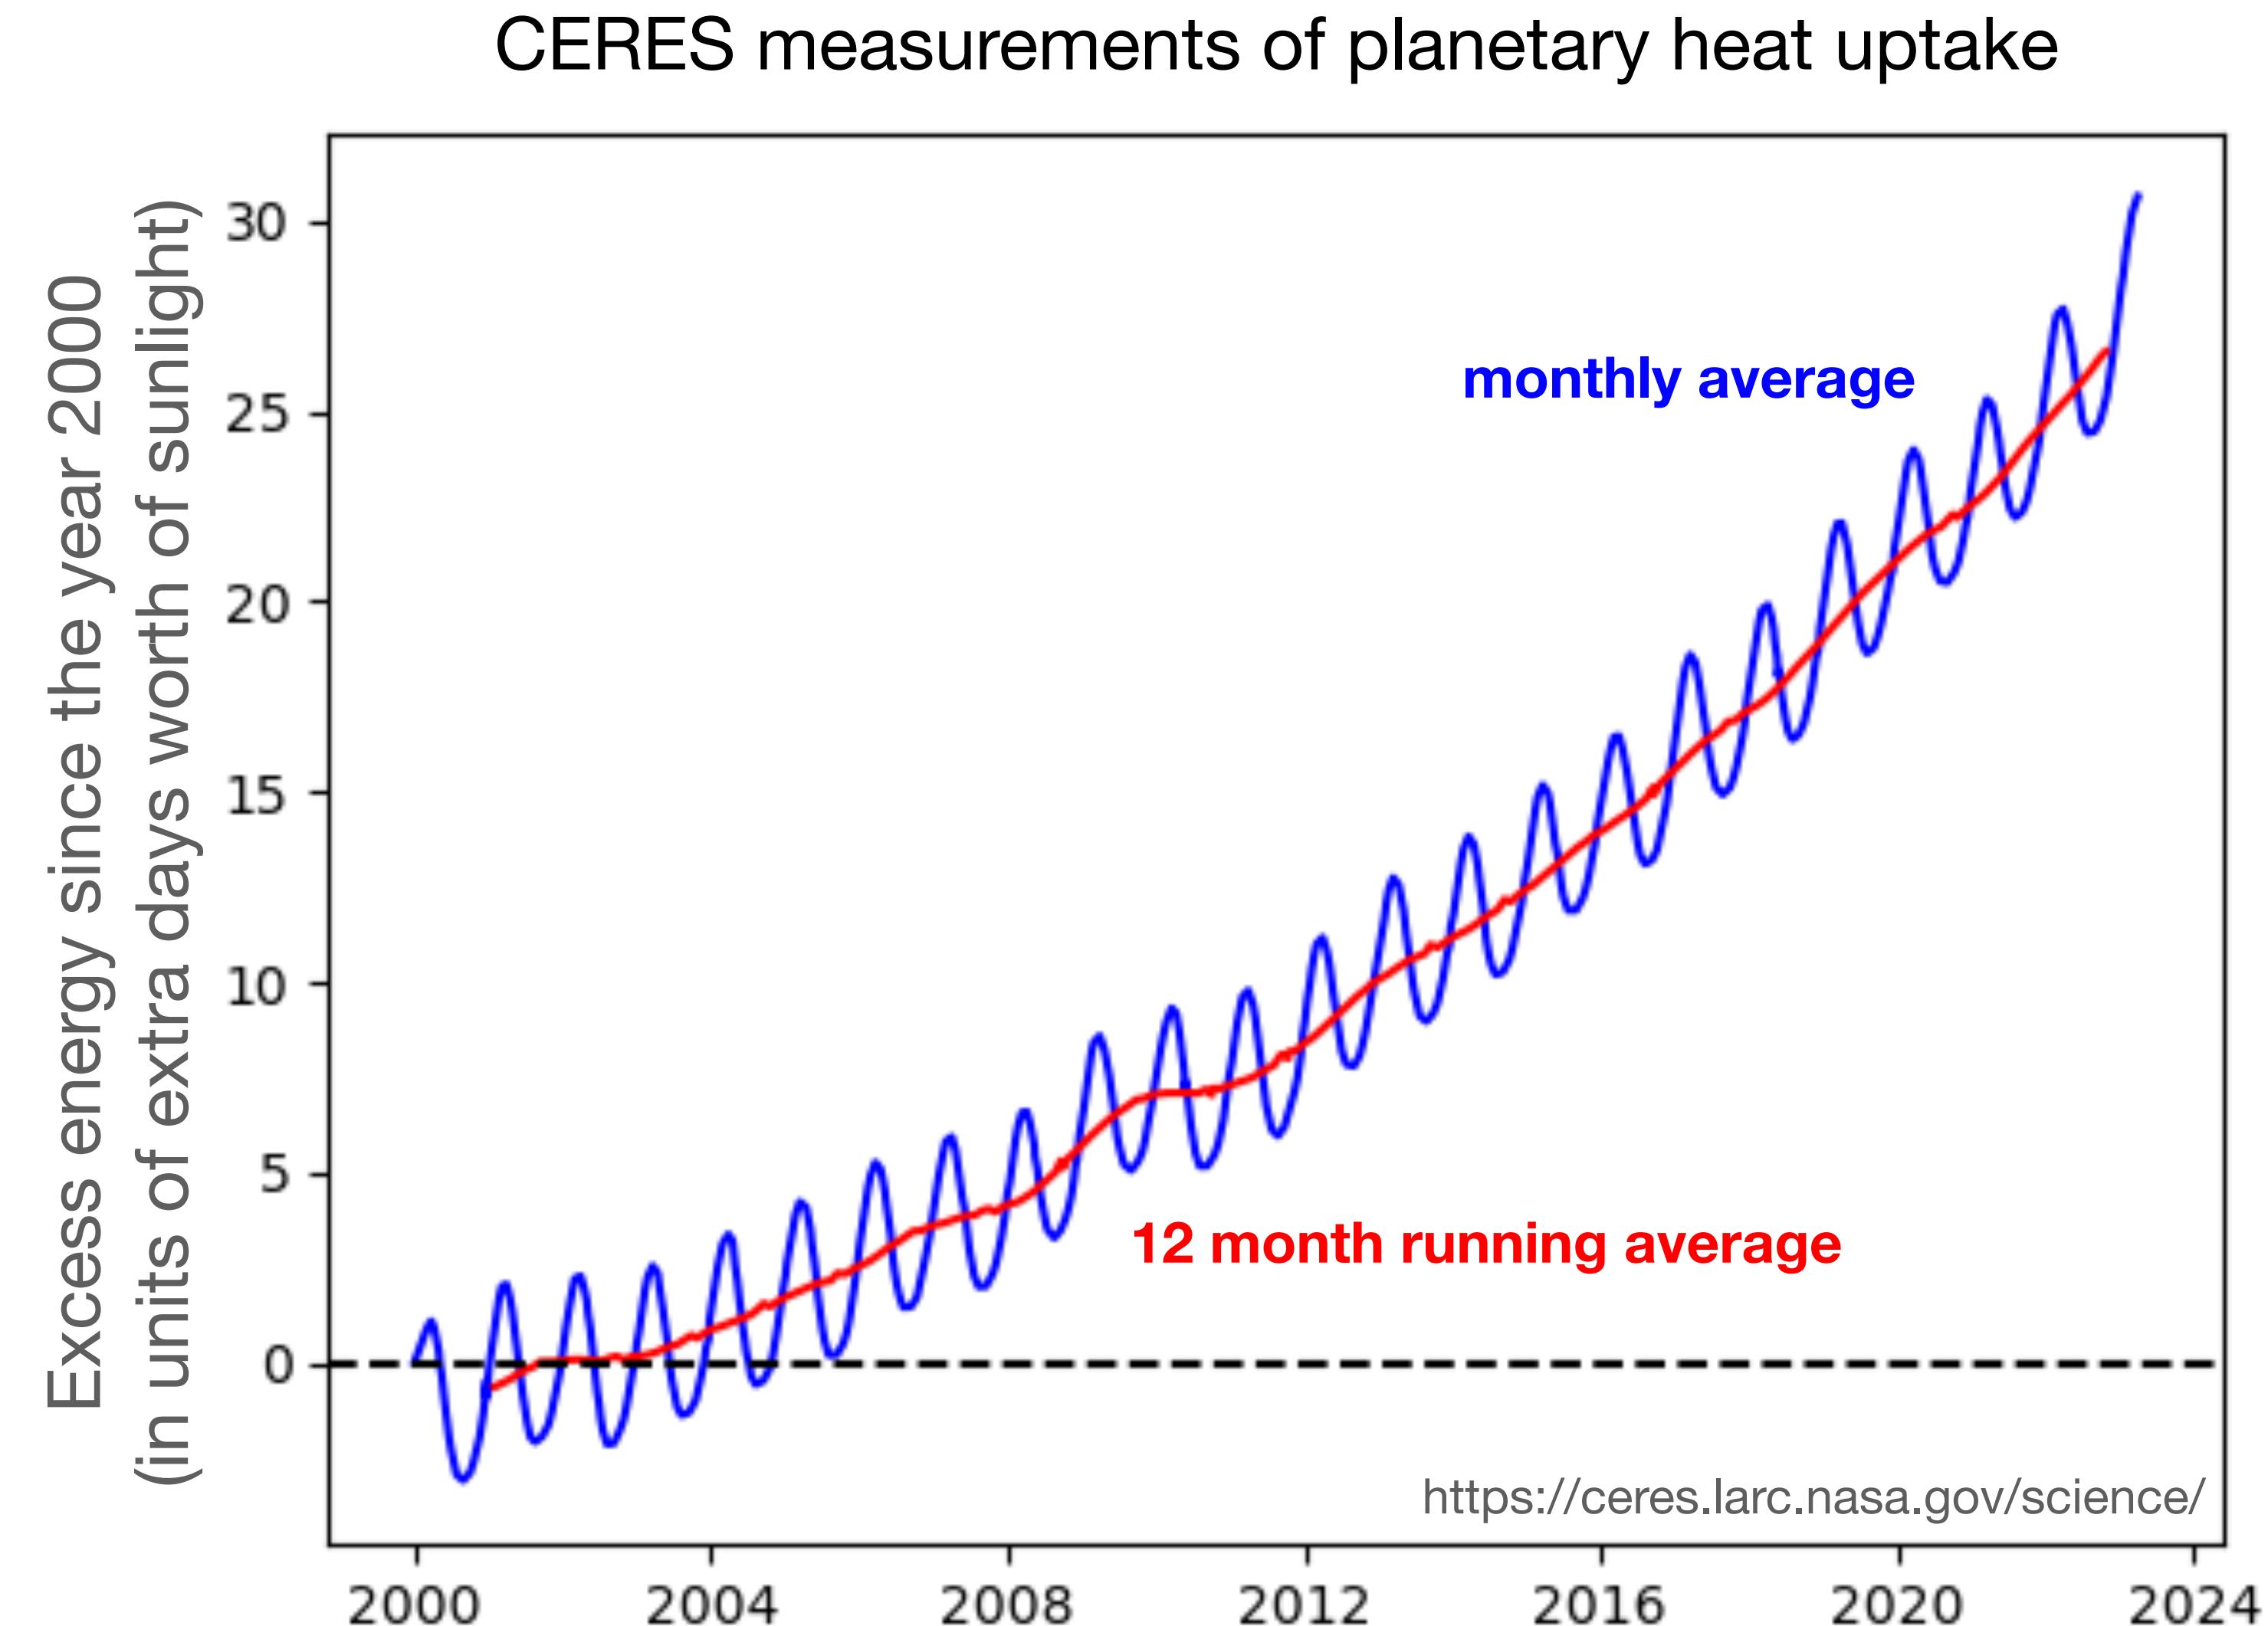

Unfocused visualization can make readers **confused** as they **attempt to figure out** what's being plotted.

**Goal:** “NASA satellite data reveals the Earth’s energy budget is becoming increasingly out of balance.”

### What can we improve?

- Unintuitive units add **additional layers of abstraction** to convey the magnitude of the effect.
- Obtrusive legends and unnecessary axis labels **add visual noise**.

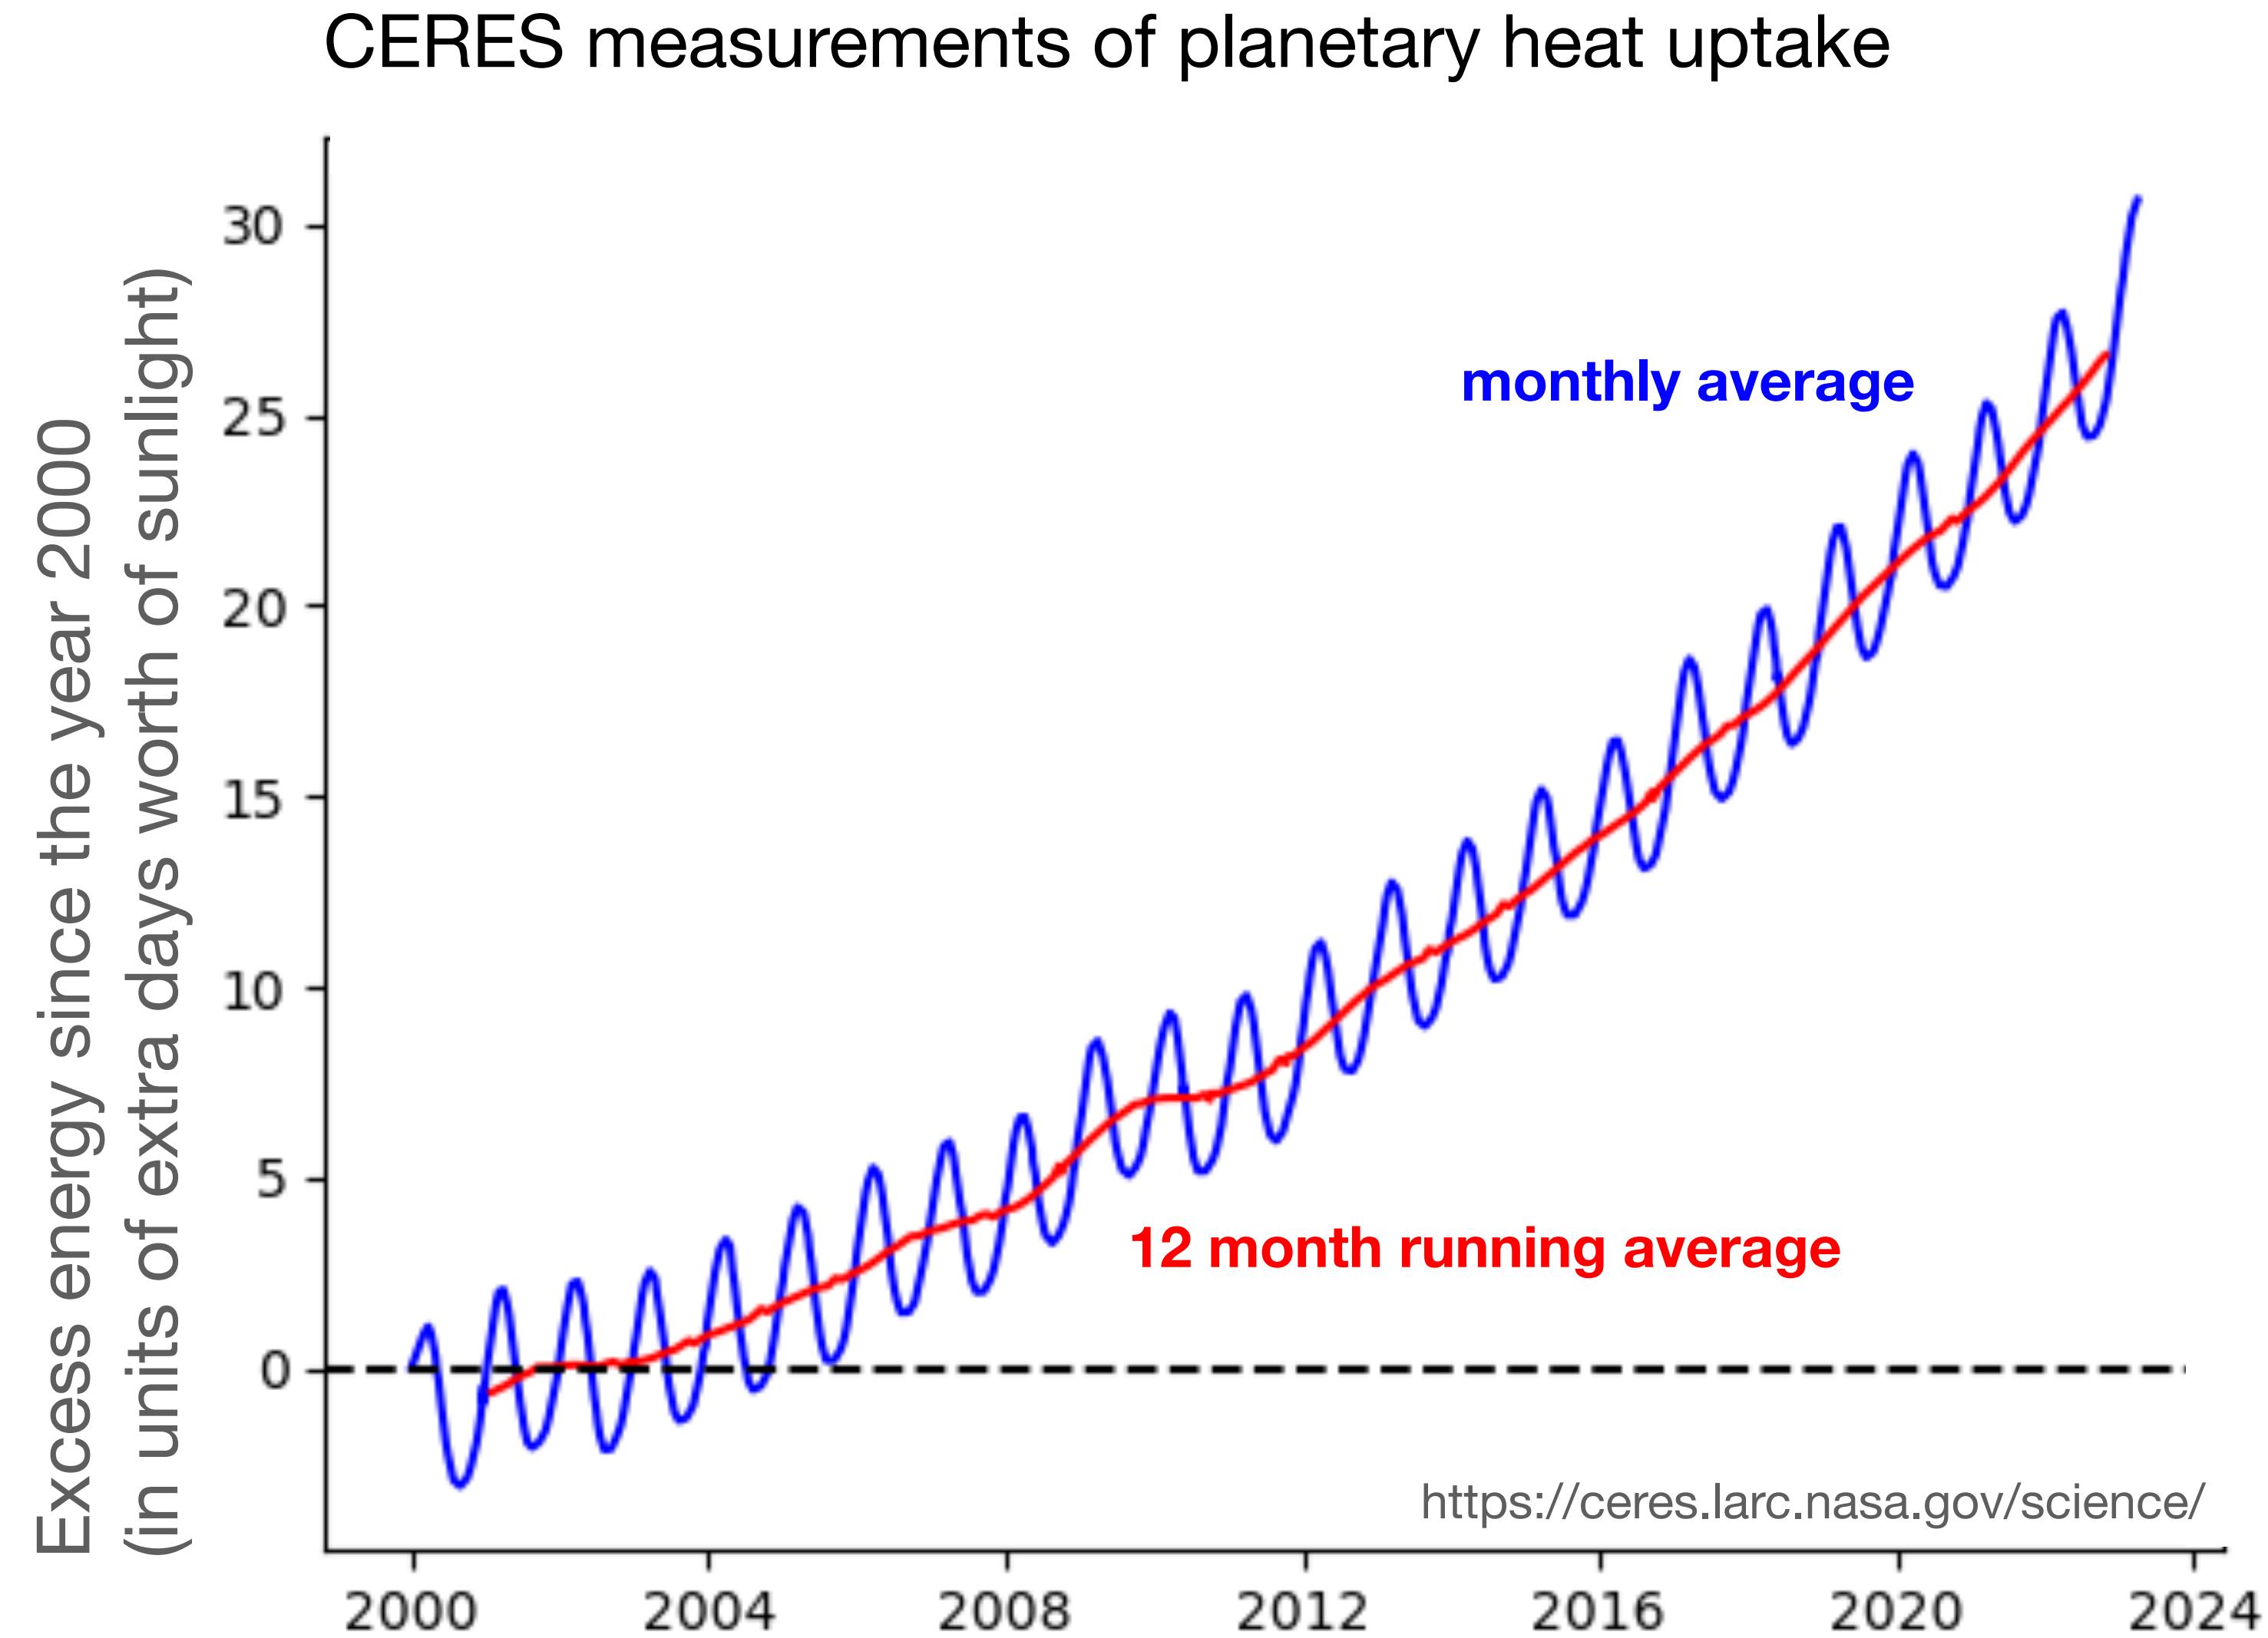

Unfocused visualization can make readers **confused** as they **attempt to figure out** what's being plotted.

**Goal:** “NASA satellite data reveals the Earth’s energy budget is becoming increasingly out of balance.”

## What can we improve?

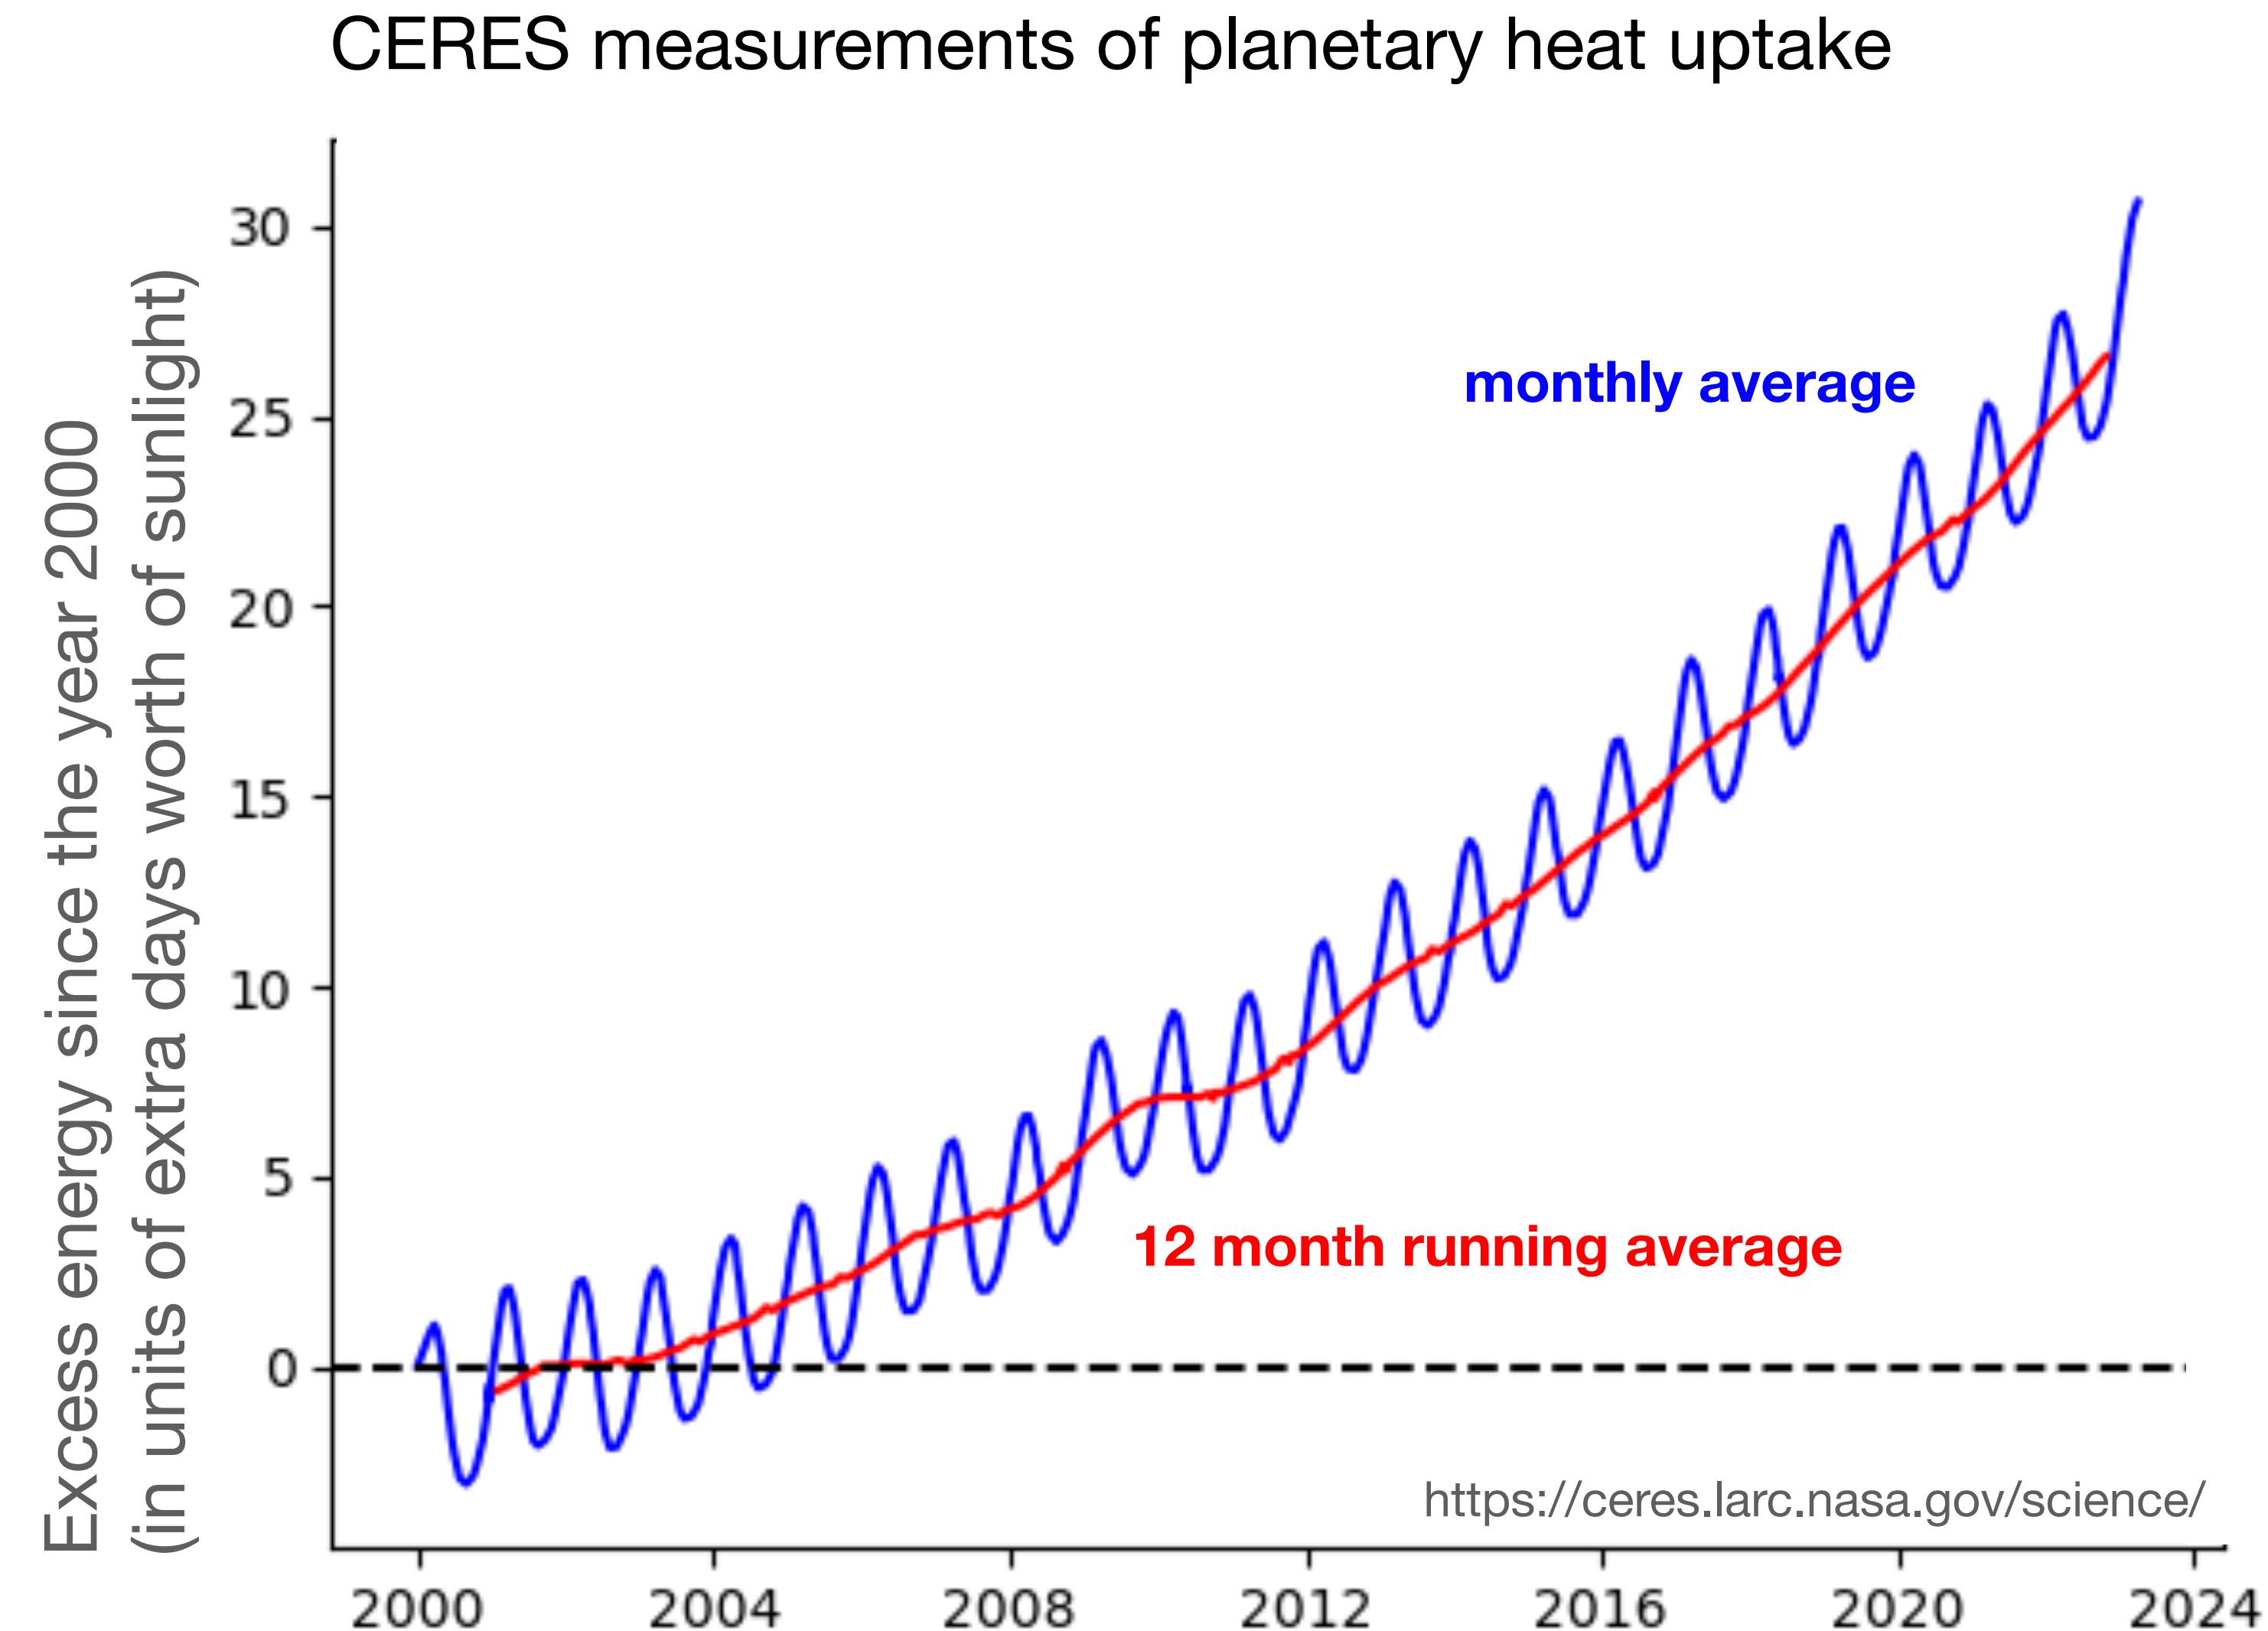

- Unintuitive units add **additional layers of abstraction** to convey the magnitude of the effect.
- Obtrusive legends and unnecessary axis labels **add visual noise**.
- Other stylistic choices can help **reduce visual noise**, e.g. replace axis spines with left-justified titles.

Focused visualization **tells a compelling story**,  
and **directs a reader's attention** to where you want it.

**Goal:** “NASA satellite data reveals the Earth’s energy budget is becoming increasingly out of balance.”

**How can we include elements of storytelling?**

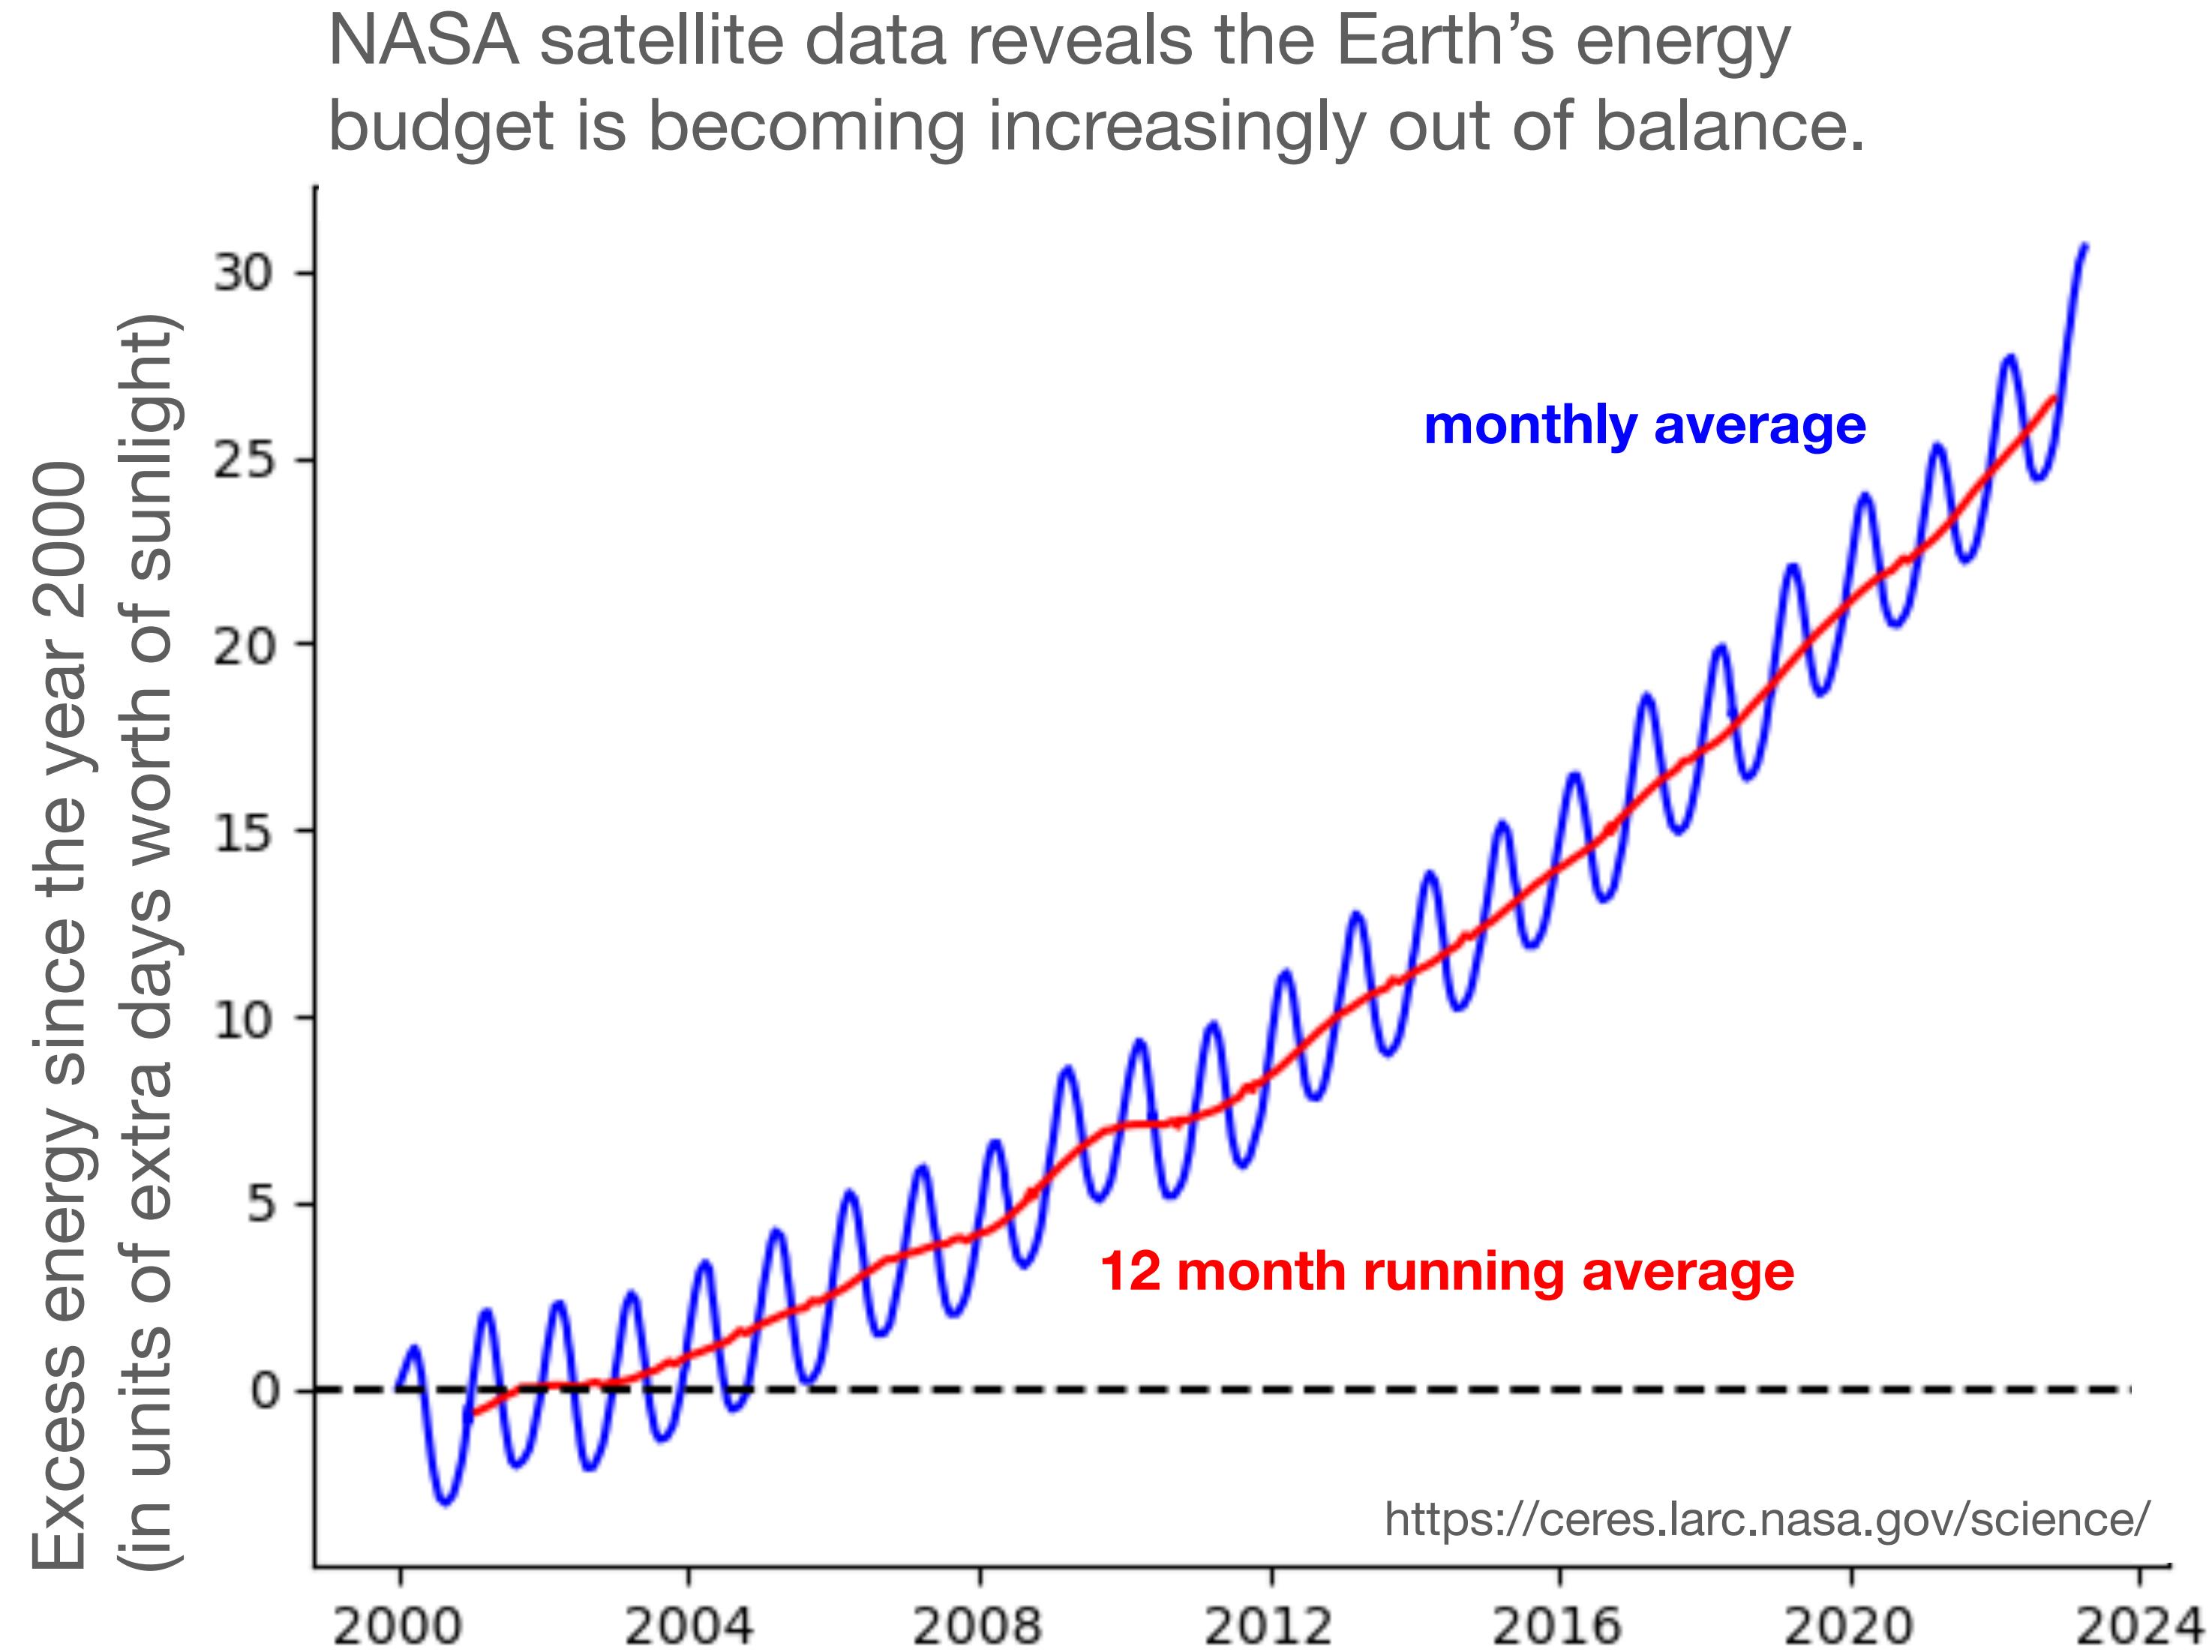

Focused visualization **tells a compelling story**,  
and **directs a reader's attention** to where you want it.

**Goal:** “NASA satellite data reveals the Earth’s energy budget is becoming increasingly out of balance.”

### How can we include elements of storytelling?

- Lead with the conclusion to help the reader to **look for the supporting evidence** they are interested in.

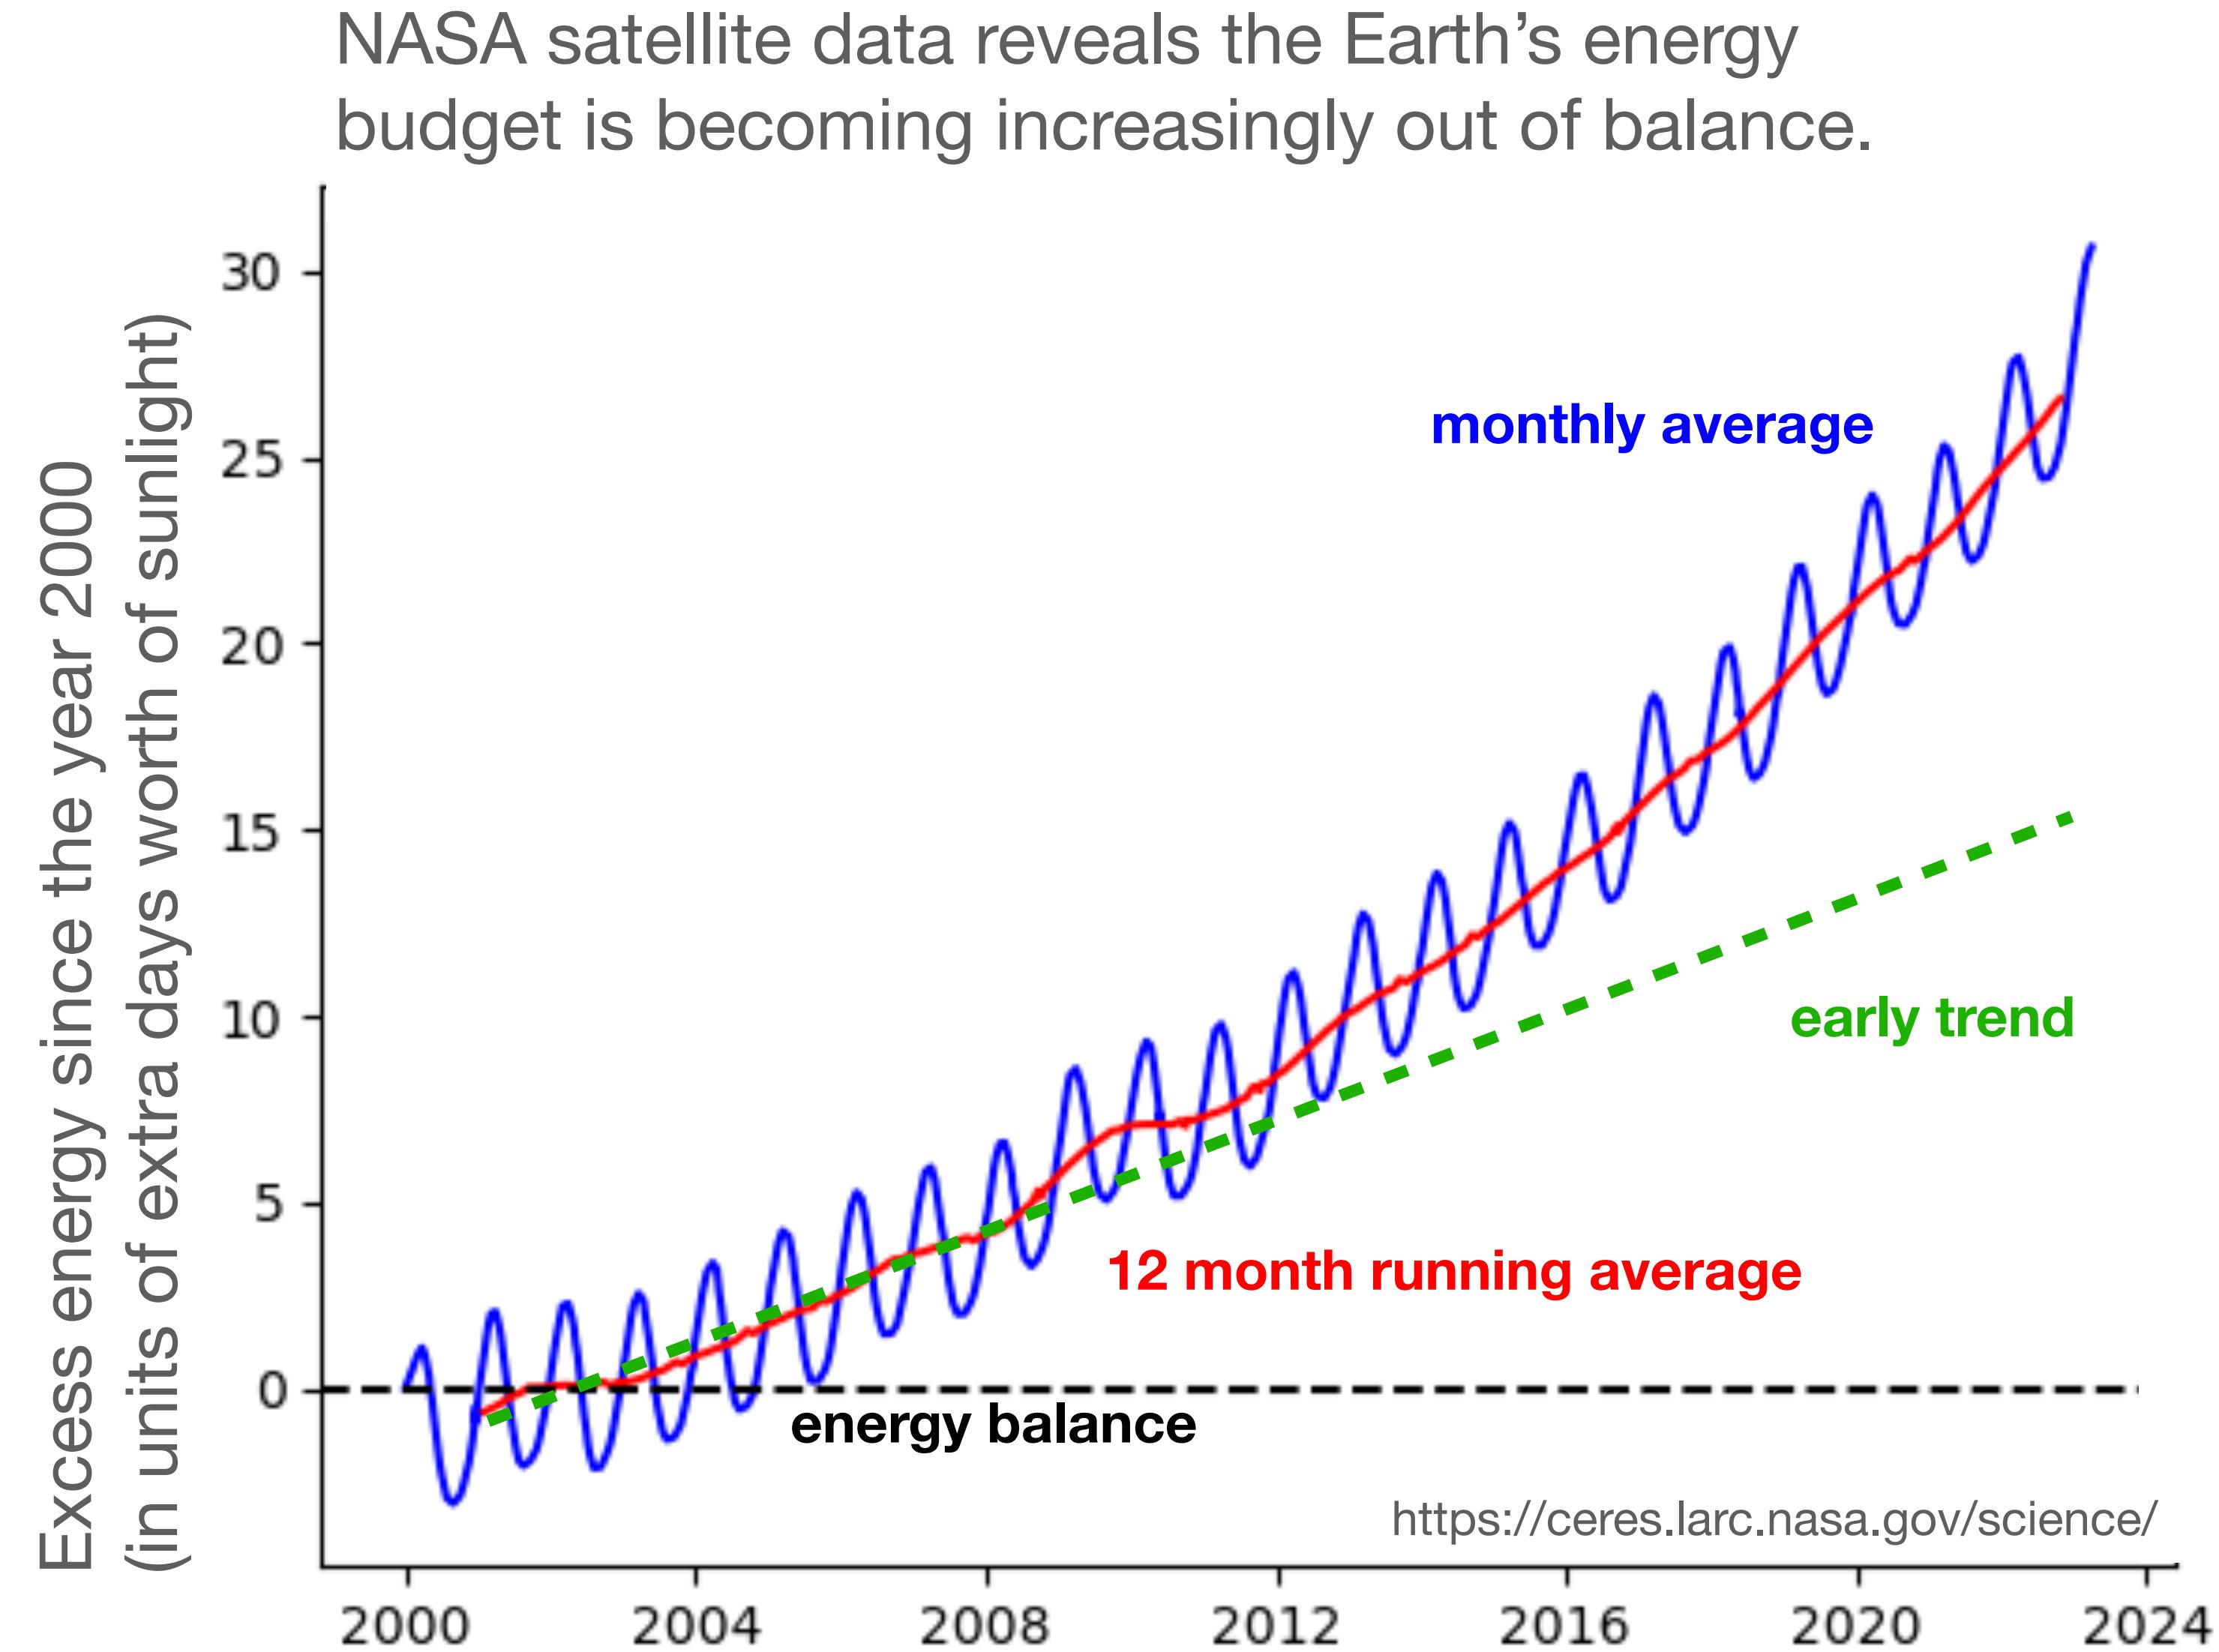

Focused visualization **tells a compelling story**,  
and **directs a reader's attention** to where you want it.

**Goal:** “NASA satellite data reveals the Earth’s energy budget is becoming increasingly out of balance.”

### How can we include elements of storytelling?

- Lead with the conclusion to help the reader to **look for the supporting evidence** they are interested in.
- Provide **context** by including clearly labeled reference lines.

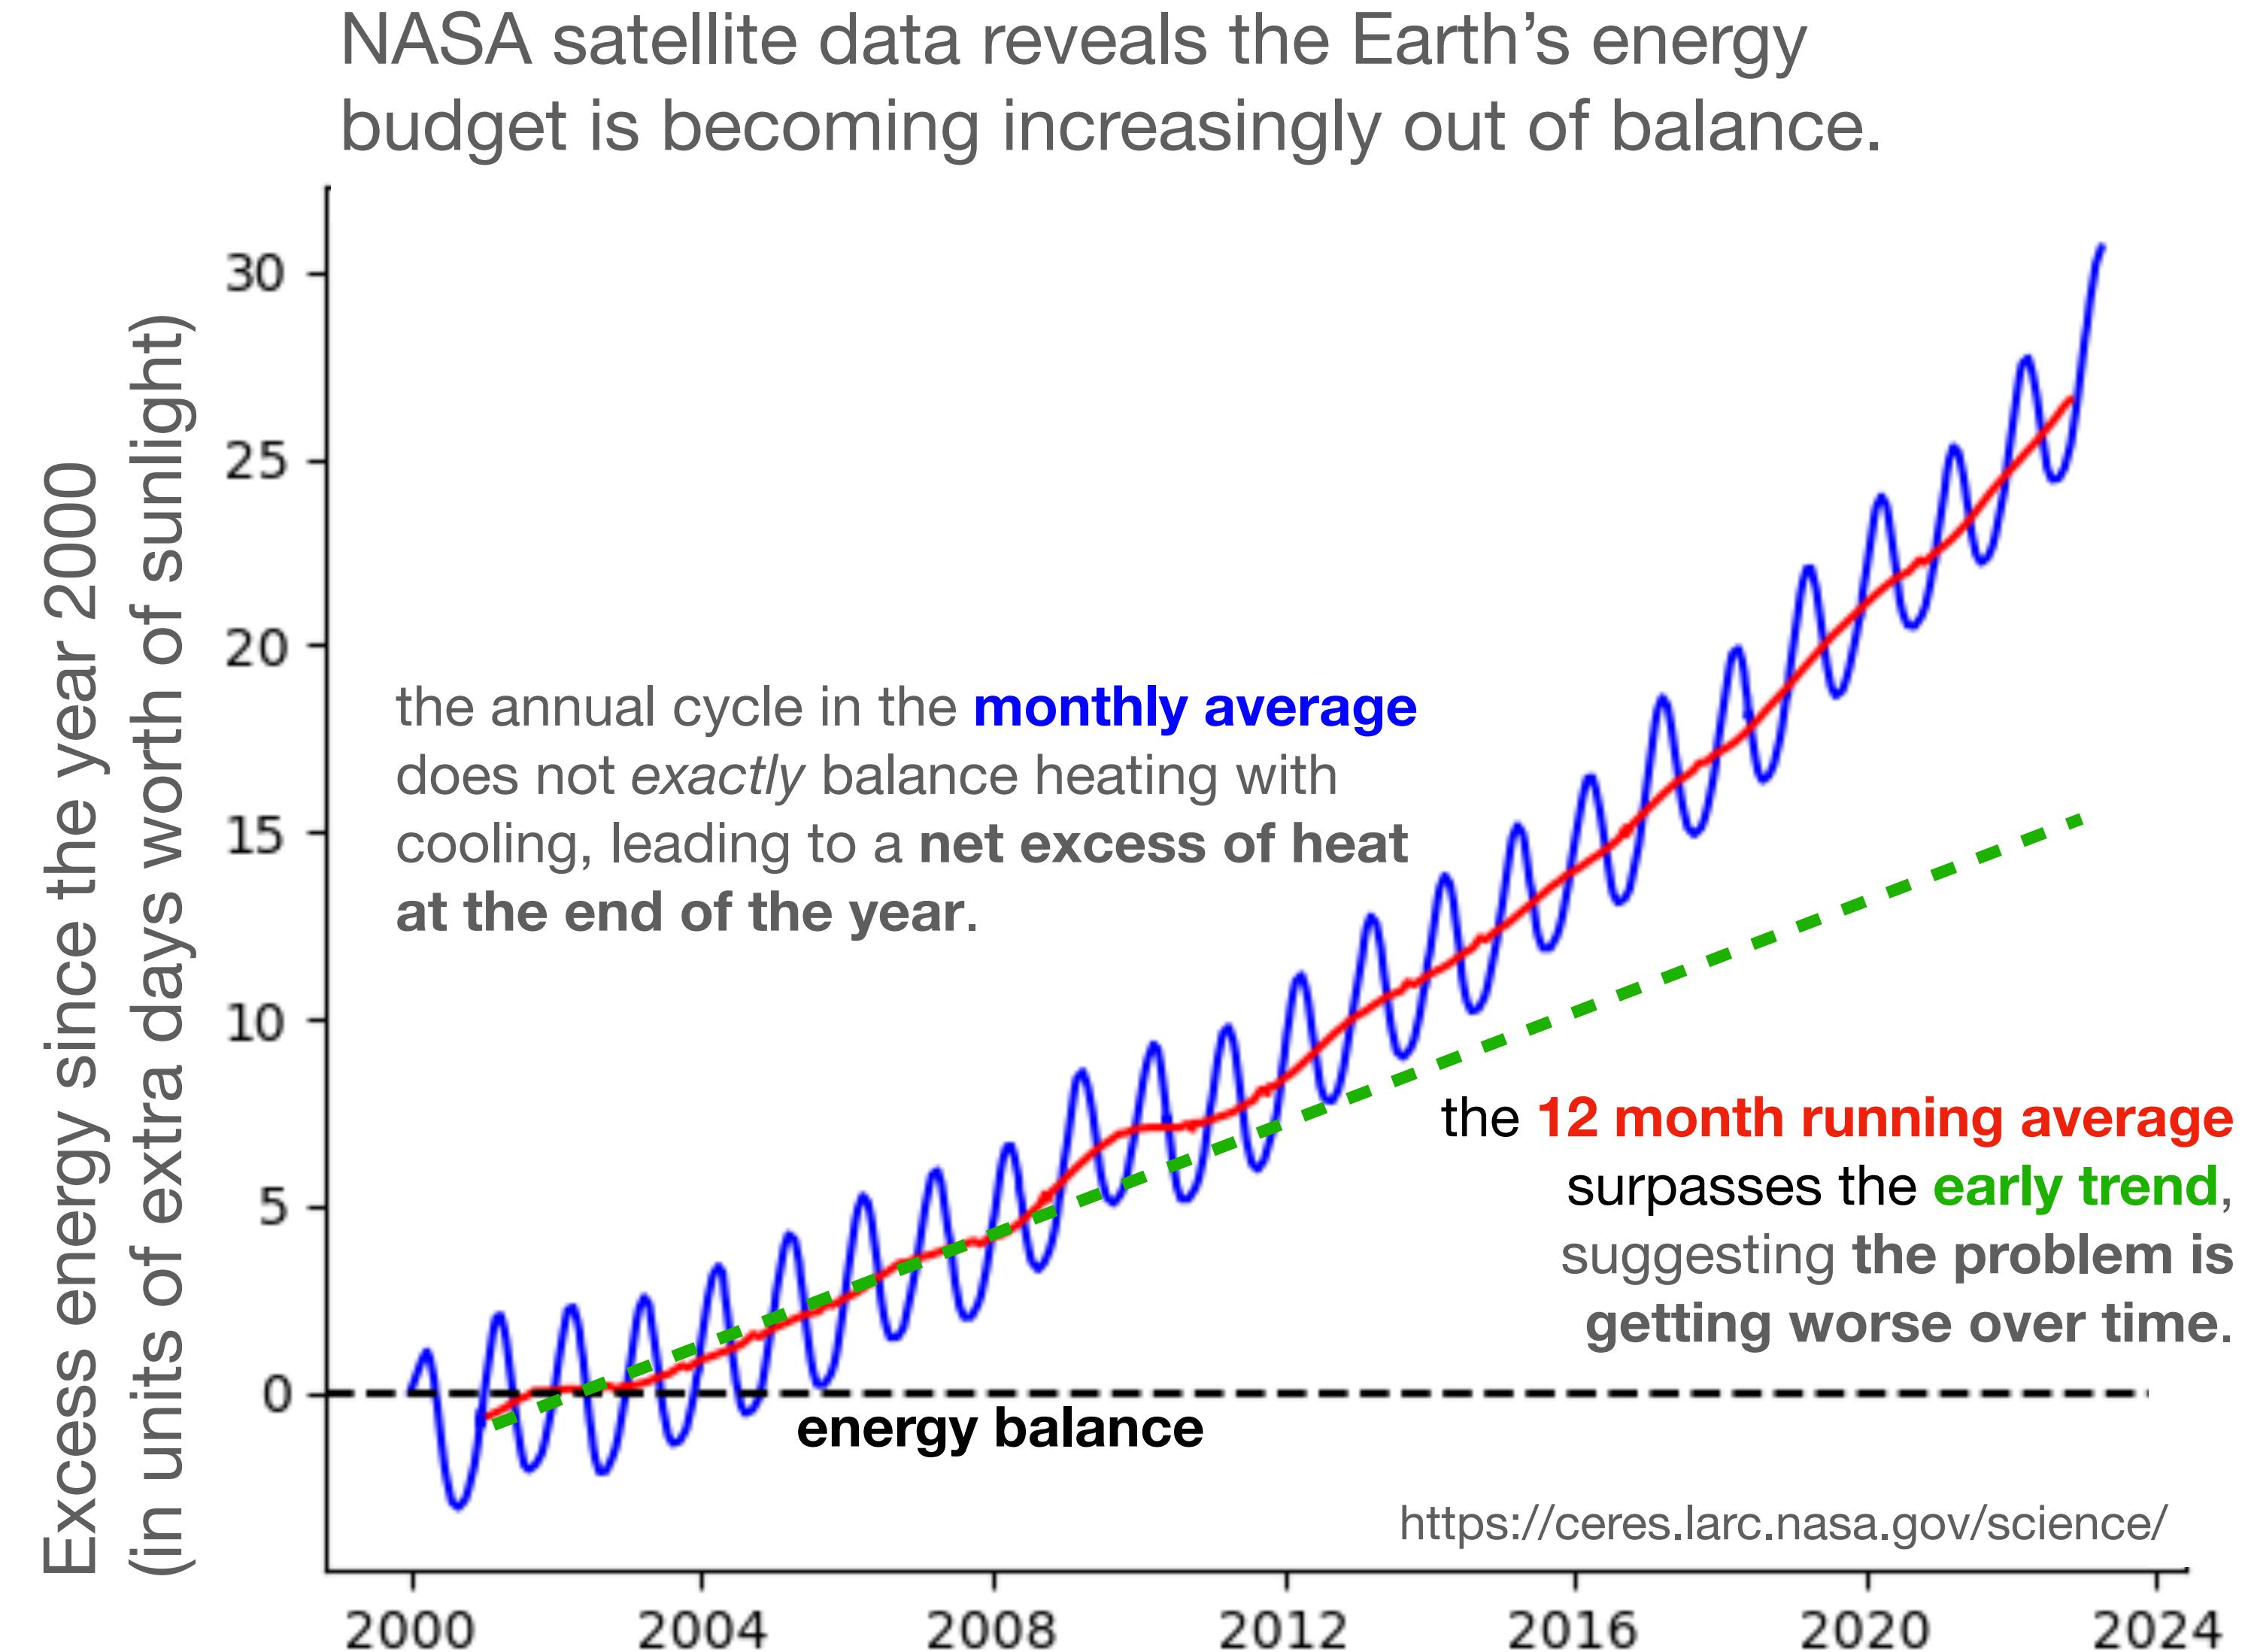

Focused visualization **tells a compelling story**, and **directs a reader's attention** to where you want it.

**Goal:** “NASA satellite data reveals the Earth’s energy budget is becoming increasingly out of balance.”

### How can we include elements of storytelling?

- Lead with the conclusion to help the reader to **look for the supporting evidence** they are interested in.
- Provide **context** by including clearly labeled reference lines.
- Use descriptive text to **highlight key features** and **guide the eye** through the graph.
